* Here is your custom footer display after selecting the custom header.

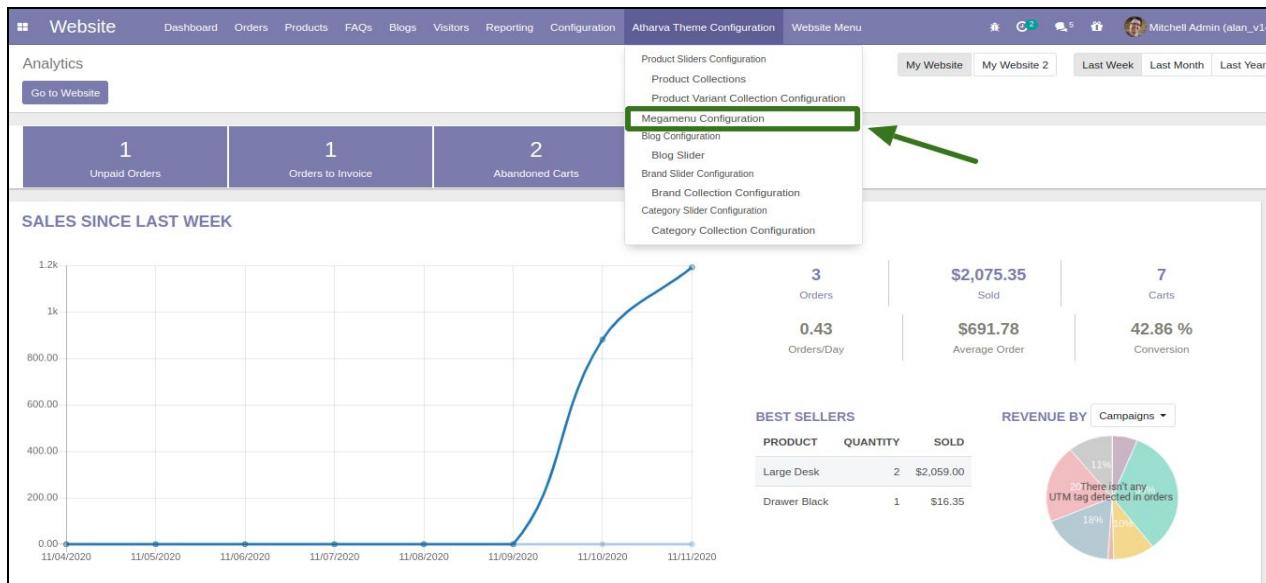

Mega Menu:

Special developed Mega Menu exclusive to the Odoo E-Commerce theme. The Alan menu is a full functional mega menu for ecommerce and shopping websites. To add a mega menu follow the following step to add a mega menu on your odoo website.

Step 1 : You need to login with admin details.

Step 2 : Open website menu.

Step 3 : Go to Atharva Theme Configuration → Megamenu configuration menu.

Step 4 : Click on the **Create button** to create a new menu for megamenu. There are total **seven** types of mega menu available.

1. Product Grid
2. Product Listing
3. Category Grid
4. Category Listing
5. Content
6. Mixed Listing
7. Horizontal Category Toggle

Main (General) configuration parameters of all menus are :

Header: You can set the header of each menu with html editor.

Footer: You can set footer of each menu with html editor

Number of Columns: You can define no of columns each menu from 1 to 6 fixed types.

Label: You can set label for your mega menu display at head of the mega menu name in header

Step 5 : Let's see how we can add different types of mega menu on our odoo website.

Product Grid: Product Grid type menu will show selected product in grid layout.

Product Name	Brand	Internal Reference	Sales Price	Cost	Actions
Desk Stand with Screen		FURN_7888	\$ 2,100.00	\$ 2,010.00	X
Drawer		FURN_8855	\$ 3,645.00	\$ 3,300.00	X
Drawer Black		FURN_8900	\$ 25.00	\$ 20.00	X
Large Cabinet	E-COM07		\$ 320.00	\$ 800.00	X
Large Meeting Table		FURN_6741	\$ 40,000.00	\$ 45,000.00	X

Product Listing: Display selected product in list view.

You can add **Pages, Category, Product** in listing from **link type** fields

The screenshot shows the 'Create Linked Item' dialog box. It has fields for 'Link Type' (set to 'Category'), 'Category Name', 'Name', 'Description', 'URL', 'Row-Position' (set to 0), 'Column-Position' (set to 0), and an 'Image' upload field. There are also 'Save & Close', 'Save & New', and 'Discard' buttons.

Note: You need to set the proper Column- Position and Row position to set menu. If you set Description then will show after the menu link in the website. You can also set Menu images using the image option.

Horizontal Category Toggle: You can create dynamic categories toggle menu using this type. You need to choose the number of columns and First , second and third level categories. It supports only upto 3 level categories.

The screenshot shows the 'Megamenu Configuration / New' dialog box. It includes fields for 'Content Name' (set to 'Horizontal category toggle'), 'Active' (checkbox checked), 'Content Type' (set to 'Horizontal Category Toggle'), 'Number of Columns' (set to 5), and 'Has Label' (checkbox unchecked). Below these are sections for 'Categories Menu Lines', 'First Level Categories', 'Second Level Categories', and 'Third Level Categories', each with tables for adding menu items with Title, Category Name, and Image columns.

Note: To Add a mega menu on your website follow below steps.

1. Click on **Website Menu**
2. Select **your website** in **website column**
3. Give **name** of your menu in **Menu column**
4. Tick True in **Dynamic Mega menu column**
5. Select Mega menu that you create in mega menu configuration in **content column**
6. Select Parent Menu where you want to display your mega menu in **Parent Menu Column**

This Snippet helps you to display the latest product on the website. It's also provide slider and grid view option so you can select any option for different slider and grid view style. To add this snippet in your website follow the following steps given below.

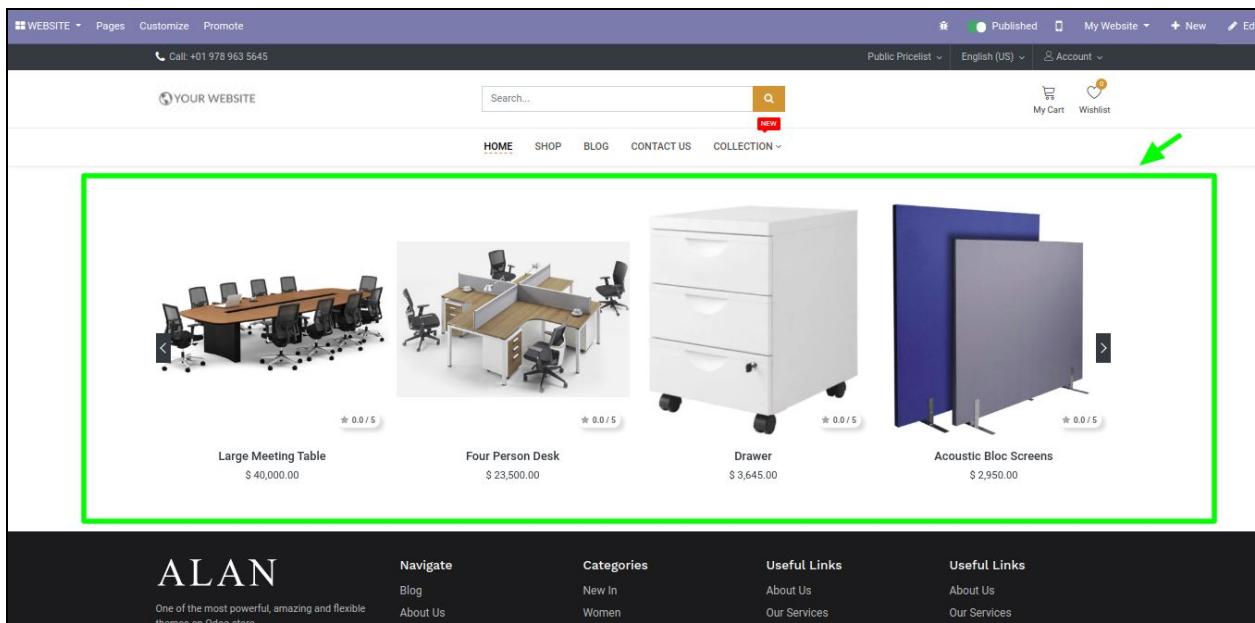

Step 1 : Login with your **Admin details**.

Step 2 : Click on the **Edit button** given at top right corner.

Step 3 : Drag and Drop **Latest Product Slider** snippet on web page

Step 4 : On dropping a snippet one **popup will appear** then you have to **select one slider option** after selecting the option click on the **save button given at top right corner**. Now you will able to see Latest Product on your website. for example

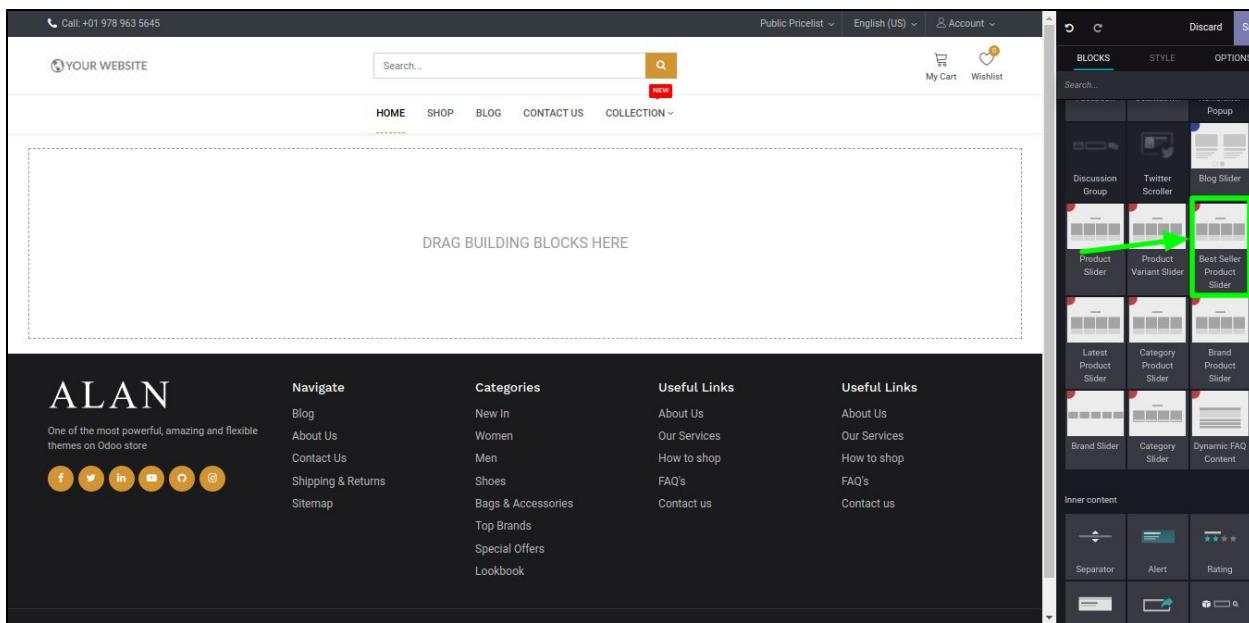

Best Seller Product Snippet

Best Seller Product Snippet is amazing snippet help you to display Best Selling Product on website with different stylist sliders and grid layout. To add this snippet follow the following steps given below:

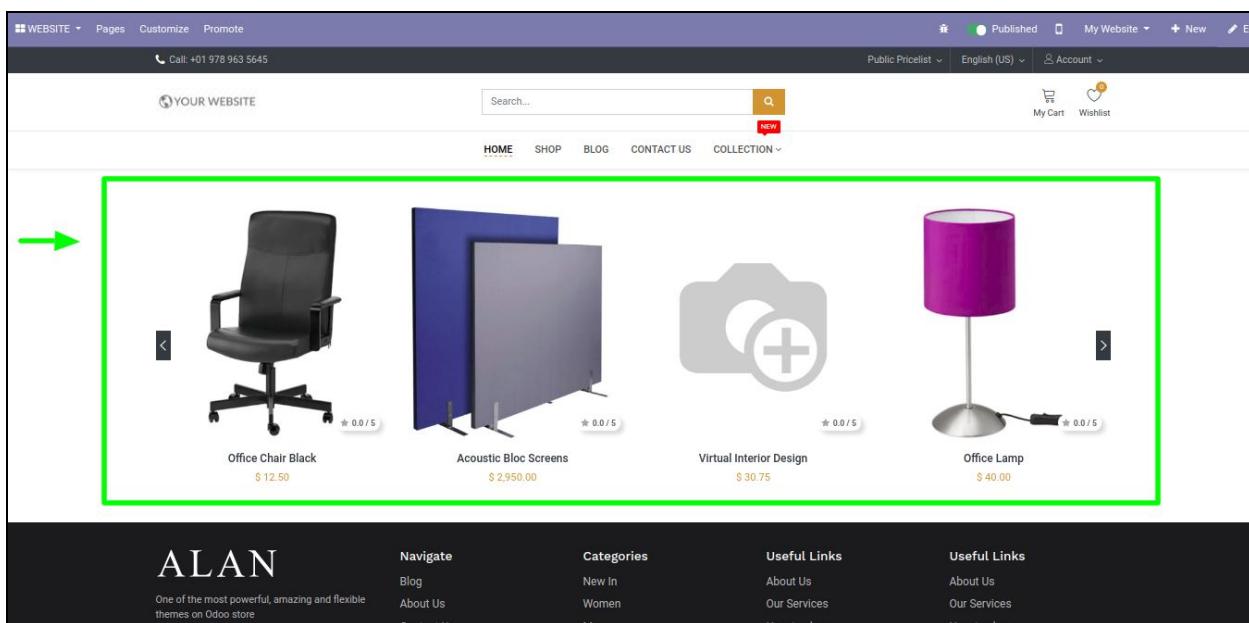

Step 1 : Login with your **admin Details**.

Step 2 : Click on **Edit Button** given at the **top right corner**.

Step 3 : Drag and Drop **Best Seller Product Slider** snippet on web page.

Step 4 : On dropping a snippet one **popup will appear** then you have to **select one slider option** after selecting the option click on the **save button given at top right corner**. Now you will able to see Best Seller Product Slider on your website. for example

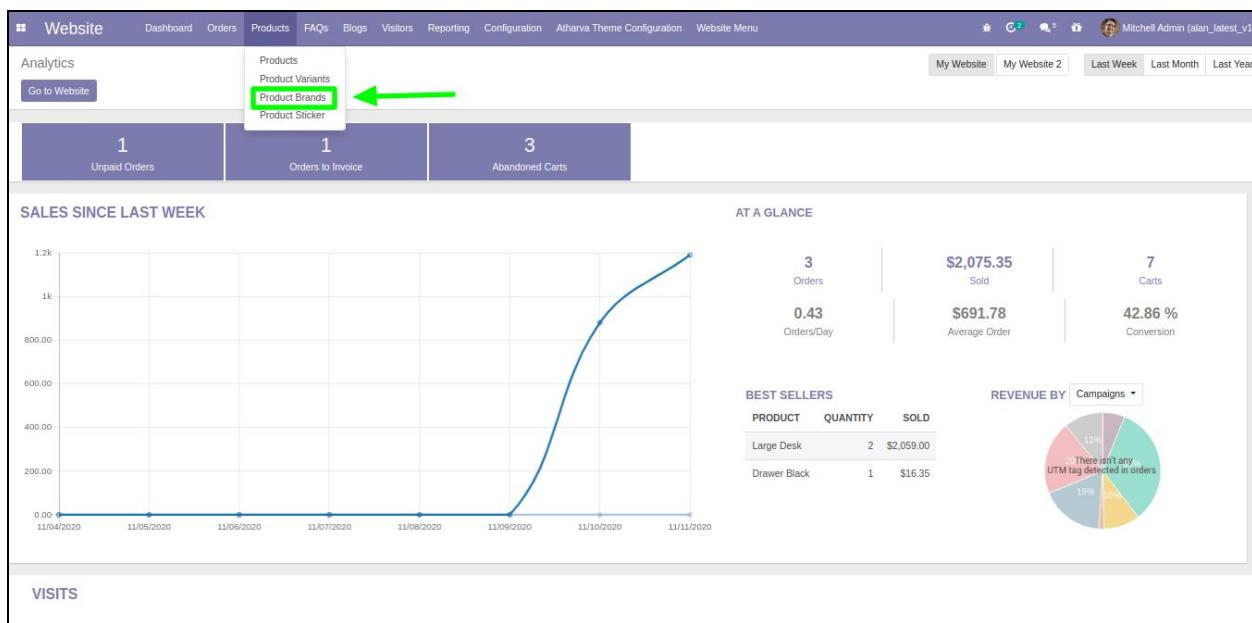

Brand Product Slider Snippet

Brand Product Slider Snippets help you to display products that are related to a particular brand. It is very useful when you want to display a specific brand product. To add this feature follow the following steps given below:

Step 1 : Login with your **Admin Details**.

Step 2 : Go To Website Menu -> Products -> Product Brands

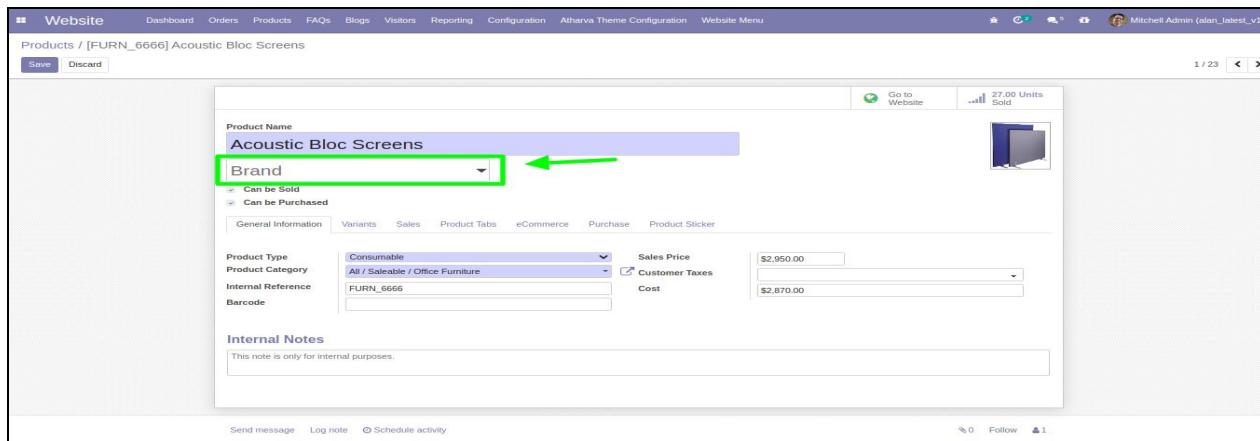

The screenshot shows the Odoo website dashboard. At the top, there is a navigation bar with links for Website, Dashboard, Orders, Products, FAQs, Blogs, Visitors, Reporting, Configuration, Atharva Theme Configuration, and Website Menu. Below the navigation bar, there is a section titled 'Analytics' with a 'Go to Website' button. A dropdown menu is open over the 'Products' link, showing options: Products, Product Variants, Product Brands, and Product Sticker. The 'Product Brands' option is highlighted with a green box and a green arrow pointing to it. Below the dropdown, there are three summary cards: '1 Unpaid Orders', '1 Orders to Invoice', and '3 Abandoned Carts'. Underneath these cards is a chart titled 'SALES SINCE LAST WEEK' showing sales volume from November 4, 2020, to November 11, 2020. To the right of the chart is a section titled 'AT A GLANCE' with metrics: 3 Orders, \$2,075.35 Sold, 7 Carts, 0.43 Orders/Day, \$691.78 Average Order, and 42.86 % Conversion. Further down are sections for 'BEST SELLERS' (listing Large Desk and Drawer Black) and 'REVENUE BY CAMPAIGNS' (a pie chart with no visible data).

Step 3: Click on **Create** and Fill all the information regarding the brand with image and save it.

Note: If you want to set brand with **existing product** then follow step:

Go to Products -> Select product -> Click on edit -> then Select Brand -> Save It.

The screenshot shows the Odoo product edit screen for a product named 'Acoustic Bloc Screens'. The top bar includes links for Website, Dashboard, Orders, Products, FAQs, Blogs, Visitors, Reporting, Configuration, Atharva Theme Configuration, and Website Menu, along with a user profile for 'Mitchell Admin (alan_latest_v14)'. The main form has tabs for General Information, Variants, Sales, Product Tabs, eCommerce, Purchase, and Product Sticker. The 'General Information' tab is selected. In the 'Product Name' field, 'Acoustic Bloc Screens' is entered. Below it, a dropdown menu labeled 'Brand' is highlighted with a green box and a green arrow pointing to it. Other settings in the 'General Information' tab include checkboxes for 'Can be Sold' and 'Can be Purchased', and dropdowns for 'Product Type' (Consumable) and 'Product Category' (All / Saleable / Office Furniture). The 'Sales' tab shows a sales price of \$2,950.00 and a cost of \$2,870.00. The bottom of the screen shows standard Odoo footer links: Send message, Log note, Schedule activity, and social media icons.

Step 4 : Go to the website and click on the edit button given at the top right corner.

Step 5 : Drag and drop the **Brand Product Slider** snippet into the web page.

The screenshot shows the Odoo website builder's interface. At the top, there are navigation links for 'HOME', 'SHOP', 'BLOG', 'CONTACT US', and 'COLLECTION'. On the right side, there is a sidebar titled 'BLOCKS' with tabs for 'STYLE' and 'OPTIONS'. Below the sidebar, there is a search bar and a 'Save' button. The main content area displays a dark-themed website for 'ALAN' with a navigation menu, categories, and useful links. In the bottom right corner of the content area, there is a snippet editor with various options like 'Facebook', 'Countdown', 'Newsletter Popup', etc. A green box highlights the 'Brand Product Slider' option in the grid of available snippets.

Step 6 : On dropping a snippet one **popup will appear** then you have to **select one slider option and Brand option as well** after selecting the options click on the **save button given at top right corner**. Now you will able to see Brand Product slider on your website:

The screenshot shows the Odoo website builder's interface with the 'Published' status. The main content area now features a 'Brand Product Slider' with three items: 'Acoustic Bloc Screens', 'Customizable Desk (CONFIG)', and 'Drawer'. A green box highlights the slider on the website, and a green arrow points from the sidebar's snippet editor towards the slider on the page.

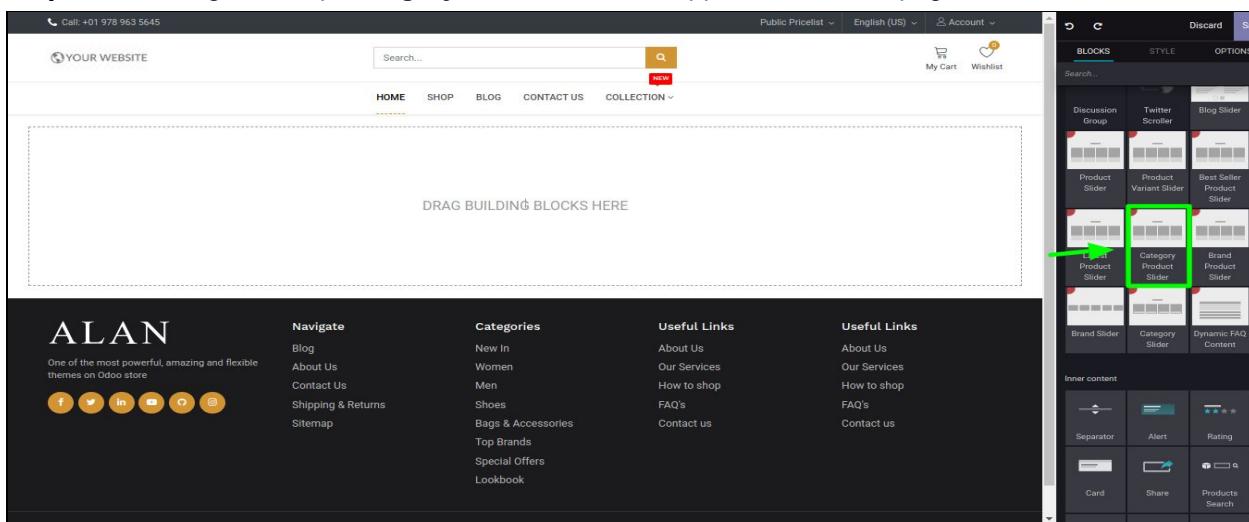

Category Product Slider Snippet

If you want to display products of a particular category then this snippet is very useful for you. So if you want to add this feature follow the following step given below:

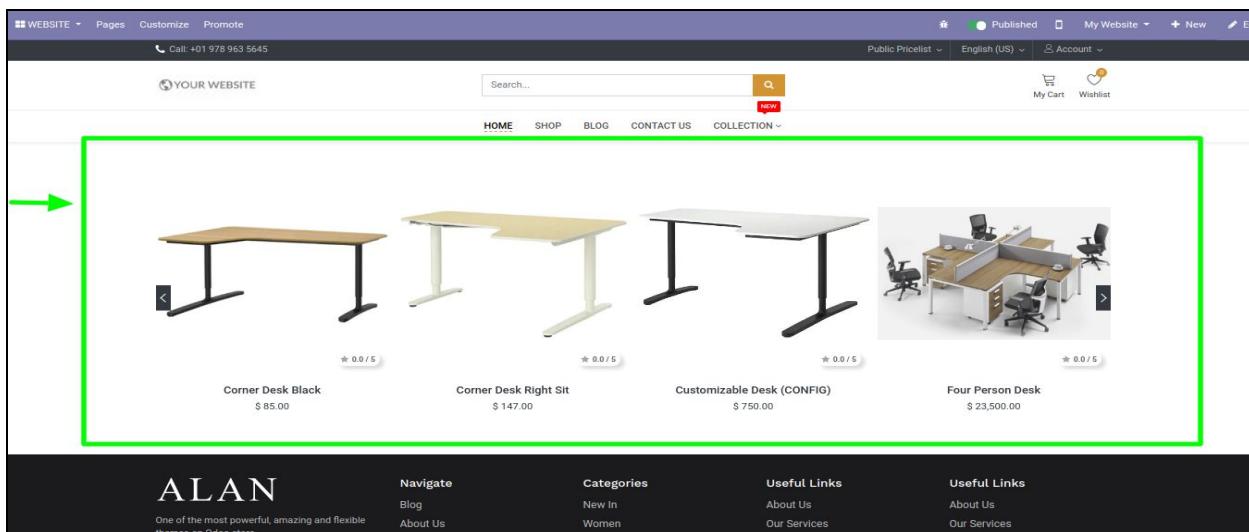

Step 1: Login with your **Admin details**.

Step 2: Go to Website and click on the **Edit button given at top right corner**.

Step 3: Now drag and drop **Category Product Slider** snippet into the web page.

Step 4 : On dropping a snippet one **popup will appear** then you have to **select Category option and Slider option as well** after selecting the options click on the **save button given at top right corner**. Now you will be able to see the Category Product slider on your website. For example

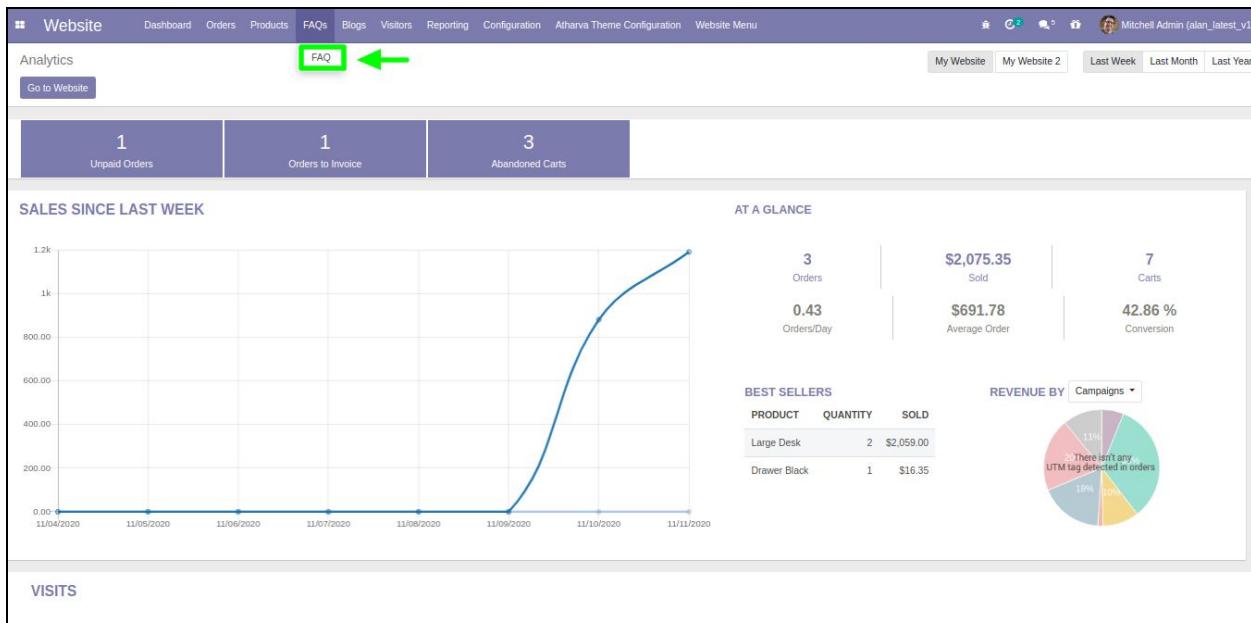

Dynamic FAQ Snippet

This snippet is used to display **Frequently Ask Questions** into a web page. To add this feature follow the following steps given below:

Step 1: Login with your Admin Details

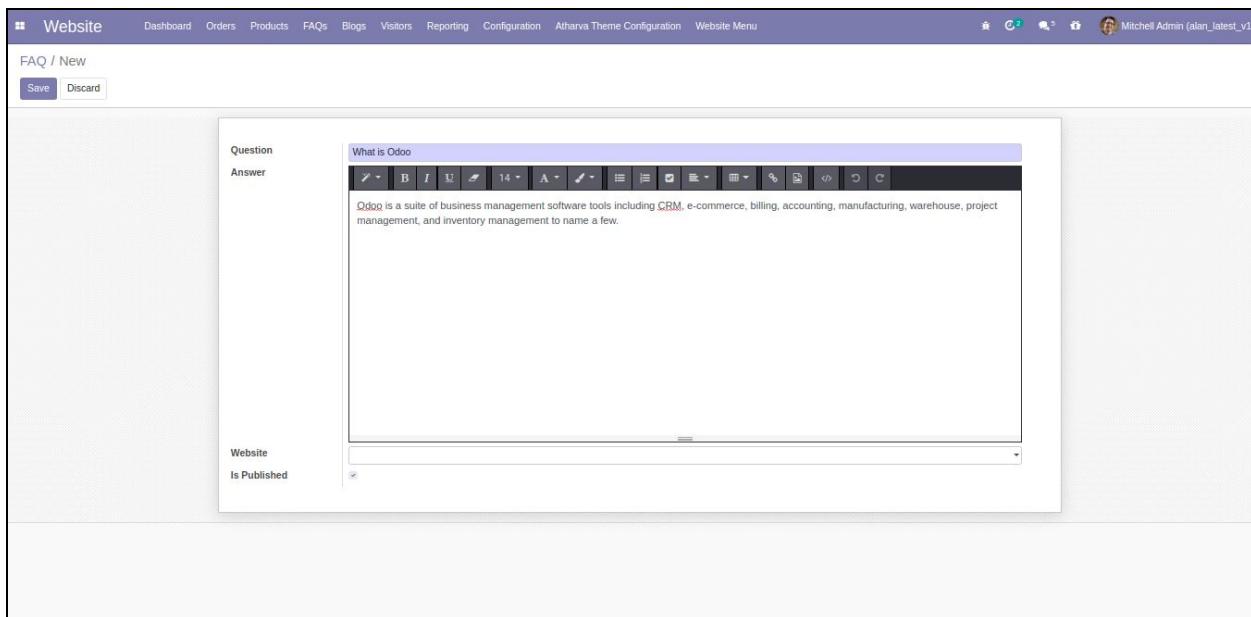

Step 2: Go to Website Menu -> FAQS -> FAQS -> Click on Create -> Fill information

The screenshot shows the Odoo Analytics dashboard. At the top, there's a navigation bar with 'Website' selected. Below it is a 'Analytics' section with a 'FAQ' button highlighted by a green arrow. The main area displays a line chart titled 'SALES SINCE LAST WEEK' showing revenue over time from November 4 to November 11, 2020. To the right, there's a 'AT A GLANCE' summary with the following data:

Metric	Value
Orders	3
Sold	\$2,075.35
Orders/Day	0.43
Average Order	\$691.78
Carts	7
Conversion	42.86 %

Below this are sections for 'BEST SELLERS' (listing Large Desk and Drawer Black) and 'REVENUE BY CAMPAIGNS' (a pie chart showing campaign distribution). The bottom part of the dashboard is labeled 'VISITS'.

The screenshot shows the 'FAQ / New' creation form. The 'Question' field contains 'What is Odoo' and the 'Answer' field contains the text: 'Odoo is a suite of business management software tools including CRM, e-commerce, billing, accounting, manufacturing, warehouse, project management, and inventory management to name a few.' There are 'Save' and 'Discard' buttons at the top left. On the left side, there's a sidebar with 'Website Is Published' checked.

Note : Do not forget to **tick true** on **is published** field if you want to **display this FAQ** on the website.

Step 3: Go to the website click on the **Edit button given at top right corner.**

Step 4: Now just drag and drop **Dynamic FAQS Snippet** into the webpage then **save it.**

The screenshot shows the Odoo website builder's editing mode. On the left, there's a preview of the website with a dark theme. The main area is a grid of blocks. A green arrow points from the 'Dynamic FAQ Content' block in the grid to its position in the sidebar. The sidebar has tabs for 'BLOCKS', 'STYLE', and 'OPTIONS'. The 'BLOCKS' tab is selected, showing various block types like Discussion Group, Twitter Scroller, Blog Slider, Product Slider, etc. The 'Dynamic FAQ Content' block is highlighted with a green border.

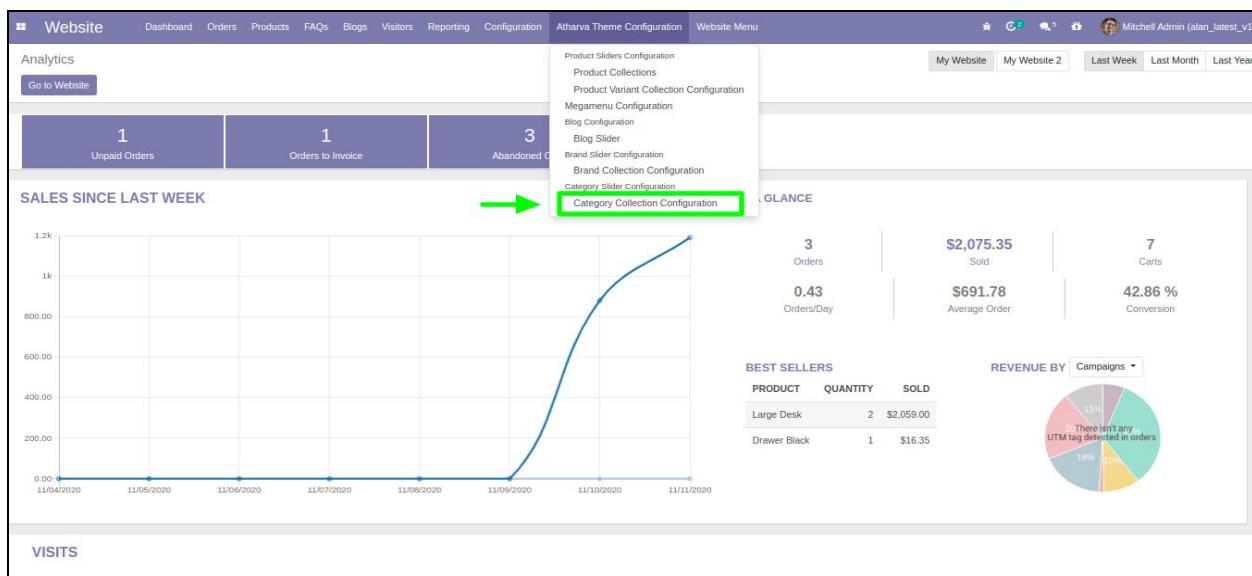

The screenshot shows the website after saving the changes. The 'Frequently Asked Question' section is now visible in the sidebar, enclosed in a green rectangular box. The rest of the website content, including the header, footer, and sidebar links, remains the same as in the first screenshot.

Category Slider Snippet

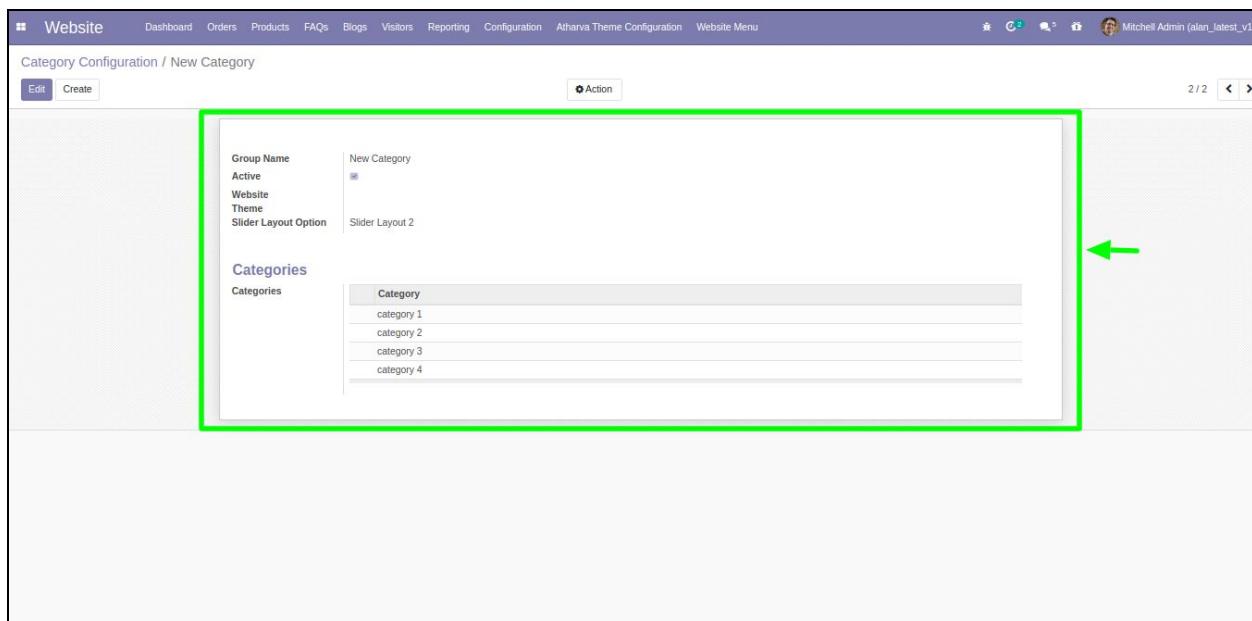

Category Slider Snippet is used to display a list of categories, so users can select a particular category and get all products regarding the selected category. To add this feature follow the following steps given below:

Step 1 : Login with your **Admin Details**.

Step 2 : Go to **Atharva theme configuration -> Category Collection configuration -> Click on Create -> Fill Information**

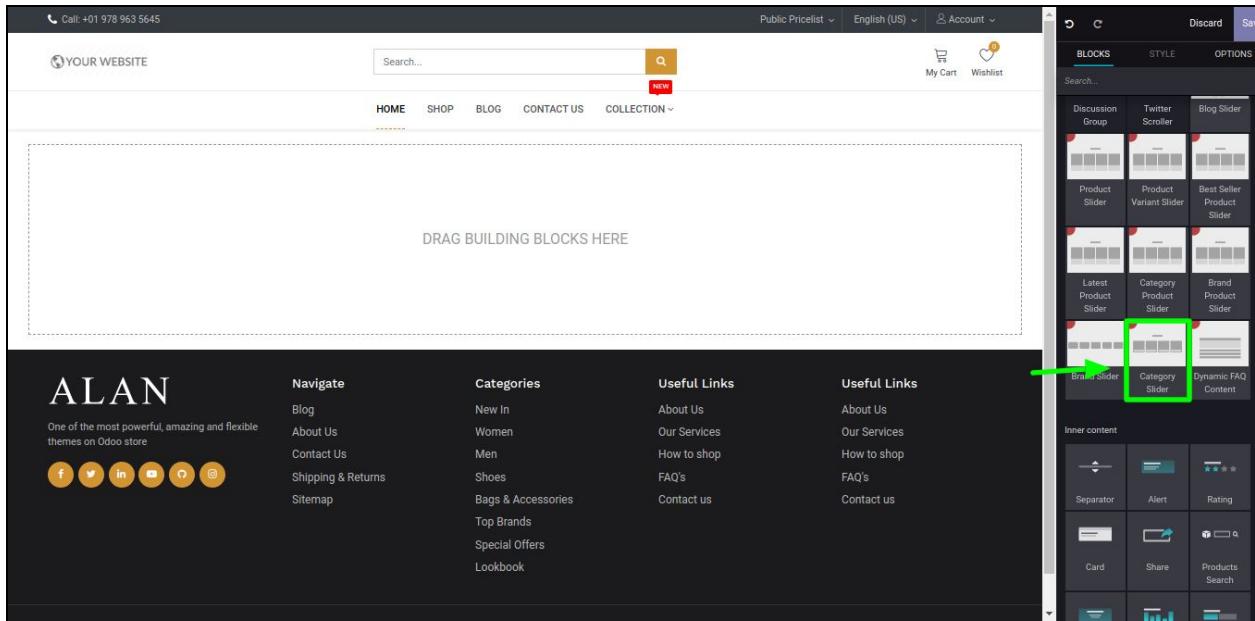

The screenshot shows the Atharva Theme Configuration dashboard. On the right side, there is a sidebar menu with various options. One of the options, 'Category Collection Configuration', is highlighted with a green box and has a green arrow pointing towards it from the left.

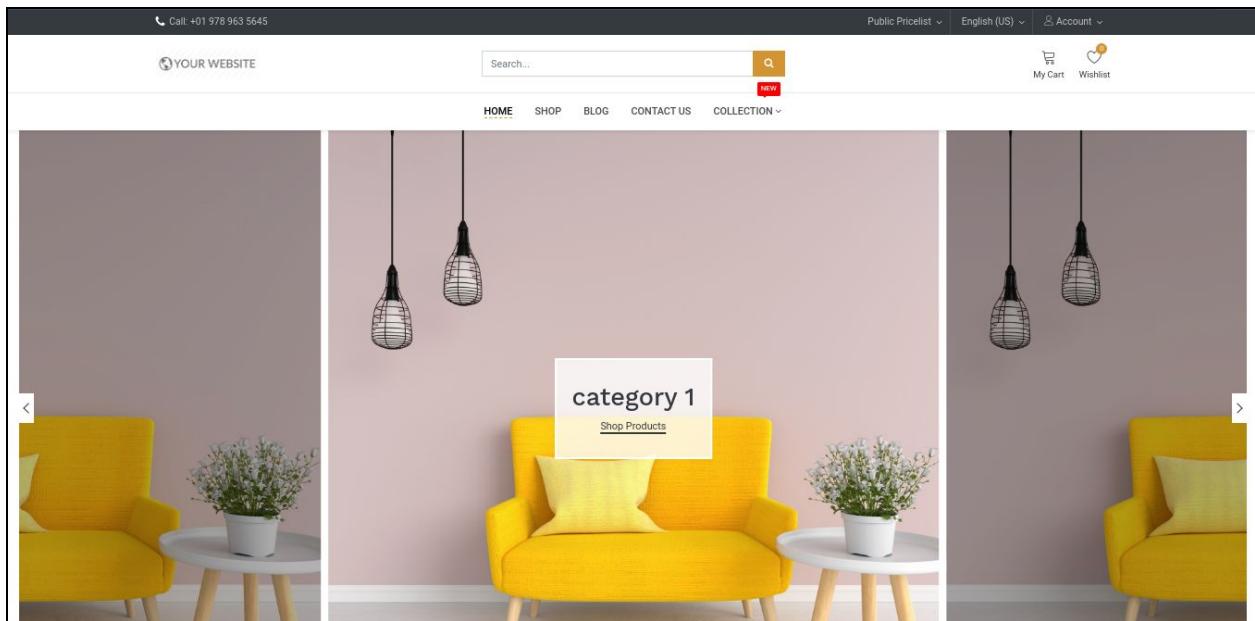

The screenshot shows the 'Category Configuration / New Category' page. In the center, there is a form with several fields. Below the form, there is a section titled 'Categories' which contains a list of categories: 'category 1', 'category 2', 'category 3', and 'category 4'. This entire 'Categories' section is highlighted with a large green box and has a green arrow pointing towards it from the right.

Step 3 : Go to **Website** and click on the **Edit button** given at **top right corner**.

Step 4 : Now drag and drop **Category Slider Snippet** into the webpage.

Step 5 : On Dropping Snippet **one popup will appear** you have to **select the category collection** then click on the **save button** given at **top right corner**. you will get your category slider: For example

Brand Slider Snippet

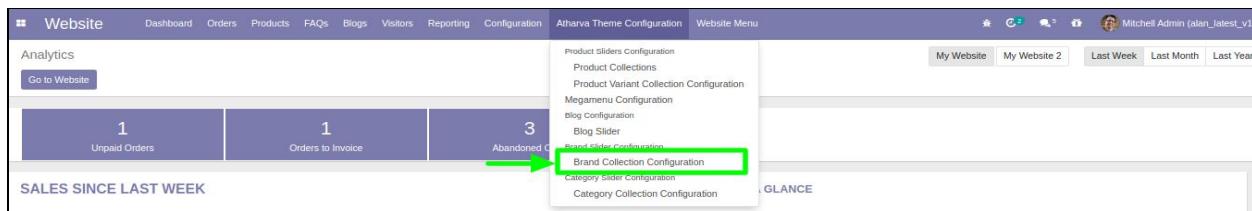

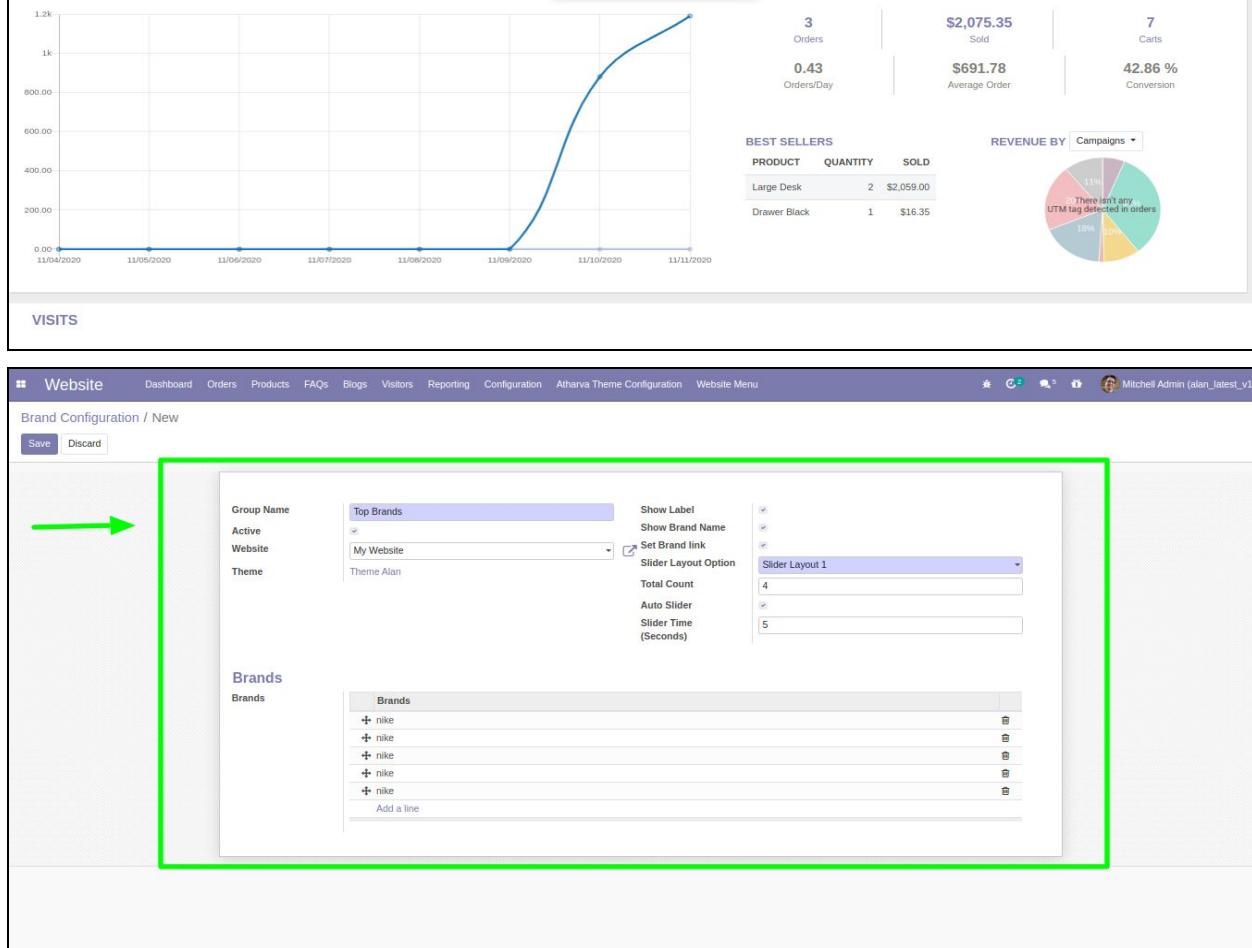

Brand Slider Snippet is used to display a list of brands, So users can select a particular brand and get all the products regarding the selected brand.

To Add this feature follow the following steps given below:

Step 1 : Login with your **Admin details**.

Step 2 : Go to **Atharva Theme Configuration -> Brand Collection Configuration ->**

Click Create Button -> Fill Information

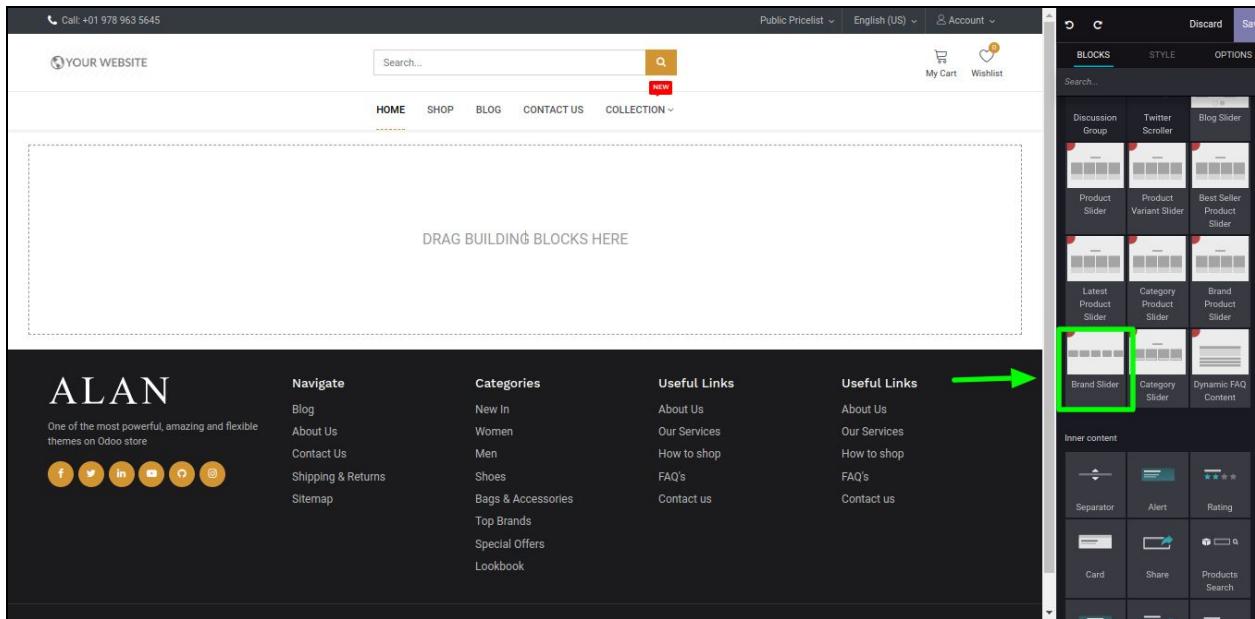

The screenshot shows the Atharva Theme Configuration interface. In the top navigation bar, under the 'Configuration' tab, there is a dropdown menu labeled 'Atharva Theme Configuration'. Within this dropdown, the 'Brand Collection Configuration' option is highlighted with a green box. Below the navigation bar, there is a dashboard section titled 'SALES SINCE LAST WEEK' featuring a line graph and various performance metrics. At the bottom of the page, there is a section titled 'VISITS'.

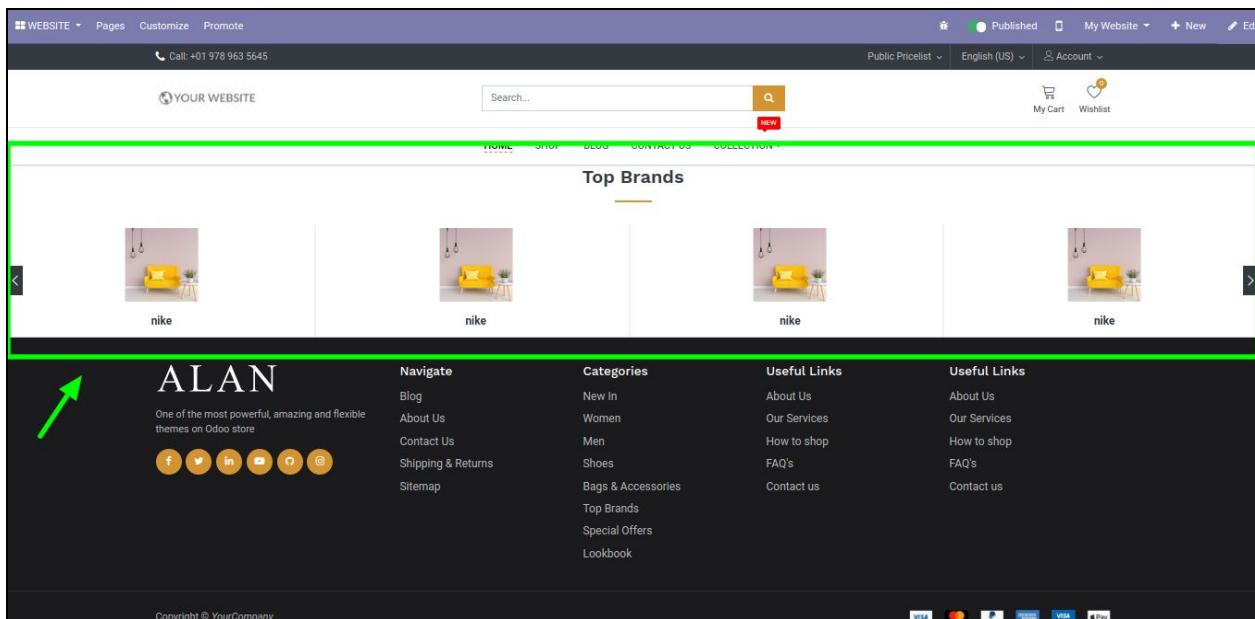

The second screenshot shows the 'Brand Configuration / New' form. It has a 'Save' and 'Discard' button at the top left. On the left side, there is a sidebar with sections for 'Group Name', 'Active', 'Website', and 'Theme'. The main area contains two tabs: 'Brands' (which is currently selected) and 'Brands'. The 'Brands' tab displays a table with several entries, each starting with a plus sign (+) and followed by the brand name 'nike'. There are also buttons for 'Add a line' and 'Delete' (represented by a trash icon). A green box surrounds the 'Brands' tab area, and a green arrow points from the top screenshot to this area.

Step 3 : Go to the website click on **Edit button** given at **top right corner**

Step 4 : Drag and Drop **Brand Slider Snippet** into the webpage.

Step 5 : On dropping a snippet **one popup will open** there you have to **select your brand collection** after that **click on continue** then click on **save button**. you will get your brand collection into a webpage. **for example**

Note : On Click any brand you will redirect to the Product Brand page where you can see all the product regarding selected brand

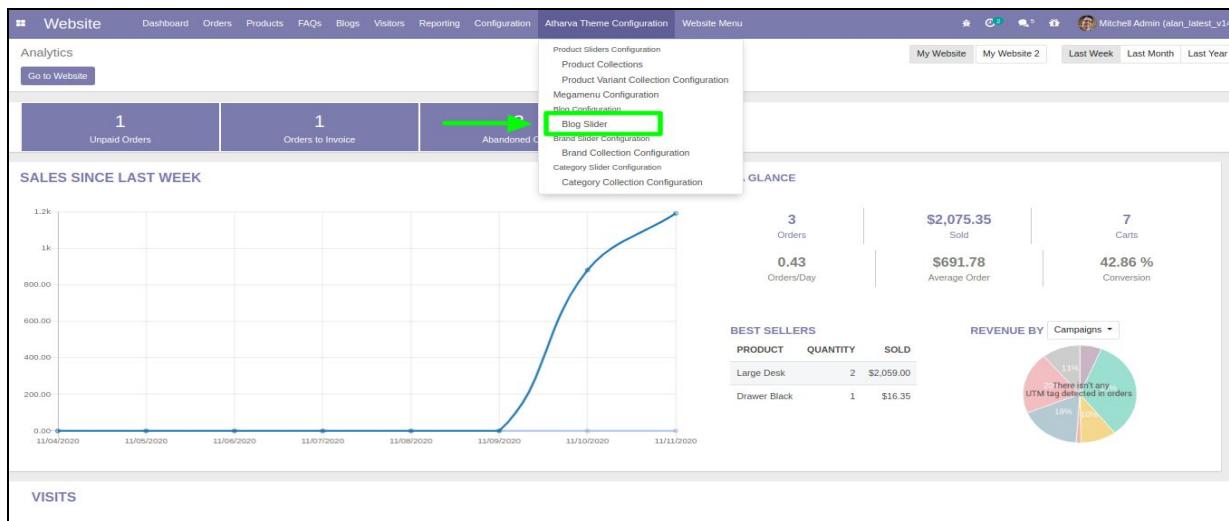

Blog Slider Snippet

If you want to display a specific blog to the user then this is the best blog snippet for you. In this snippet you have to make a collection of a particular blog that you want to display and with the help of the Blog slider snippet you can display your blog collection into the webpage.

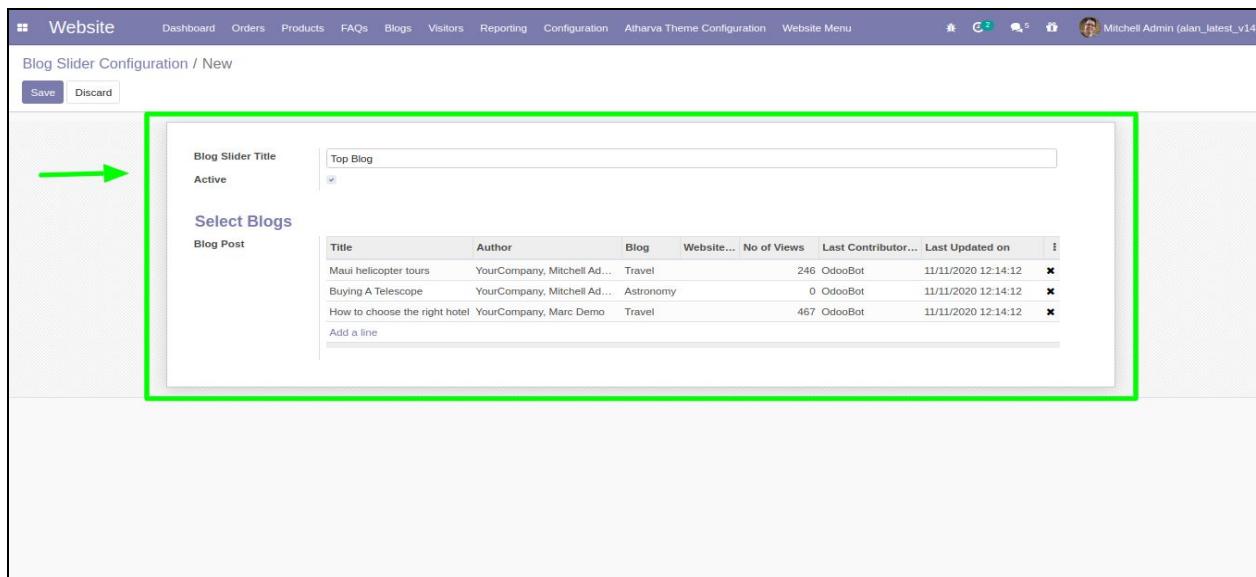

To add this feature follow the following steps given below:

Step 1 : Login with your **Admin credentials**

Step 2 : Go to **Atharva Theme Configuration -> Blog Slider -> Click on Create -> Create your Collection**

The screenshot shows the Atharva Theme Configuration dashboard. The top navigation bar includes links for Website, Dashboard, Orders, Products, FAQs, Blogs, Visitors, Reporting, Configuration, Atharva Theme Configuration, and Website Menu. A sidebar on the left lists various configuration options, with 'Blog Slider' highlighted by a green box. The main content area displays 'SALES SINCE LAST WEEK' with a line graph showing sales volume increasing from November 4 to November 11, 2020. Below the graph is a 'VISITS' section. To the right is a 'GLANCE' section with metrics like '3 Orders', '\$2,075.35 Sold', '0.43 Orders/Day', '\$691.78 Average Order', '7 Carts', and '42.86 % Conversion'. There are also sections for 'BEST SELLERS' and 'REVENUE BY Campaigns'.

The screenshot shows the 'Blog Slider Configuration / New' page. At the top, there are 'Save' and 'Discard' buttons. The main form has a 'Blog Slider Title' field containing 'Top Blog' and an 'Active' checkbox checked. A large green box highlights the 'Select Blogs' section. This section includes a 'Blog Post' heading and a table listing three blog posts: 'Maui helicopter tours', 'Buying A Telescope', and 'How to choose the right hotel'. Each row in the table includes columns for Title, Author, Blog, Website..., No of Views, Last Contributor..., and Last Updated on. A green arrow points to the left side of the 'Select Blogs' section.

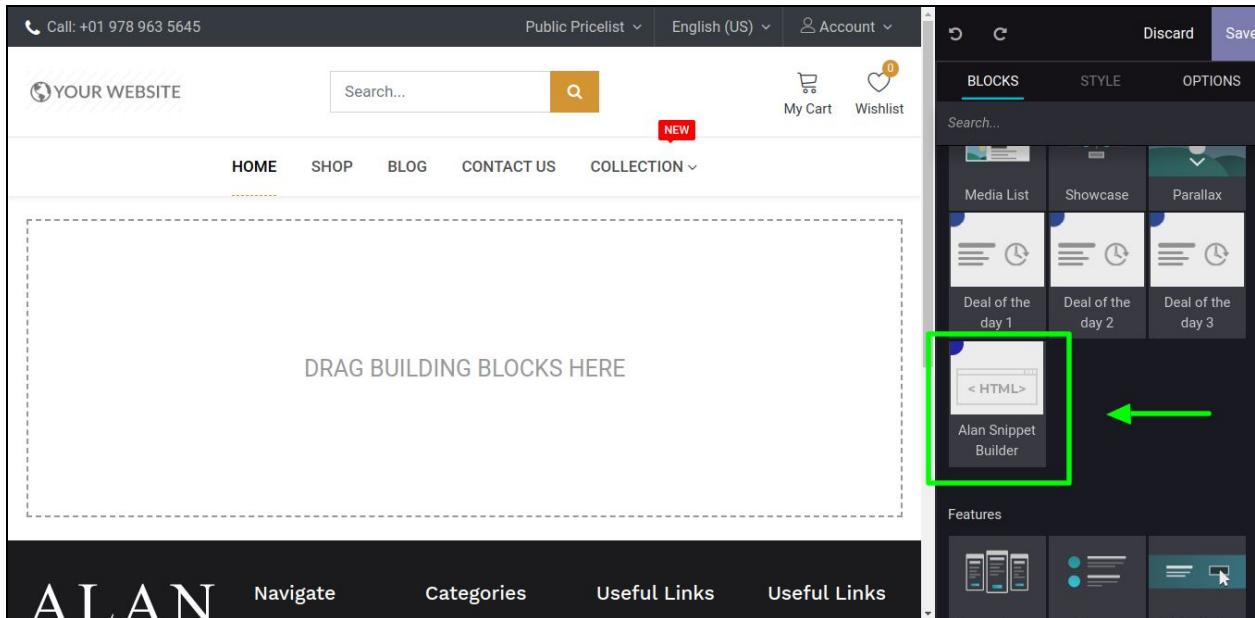

Step 3 : Go to Website click on **Edit button** given at **top right corner**

Step 4 : Drag and drop **Blog Slider snippet** into the webpage.

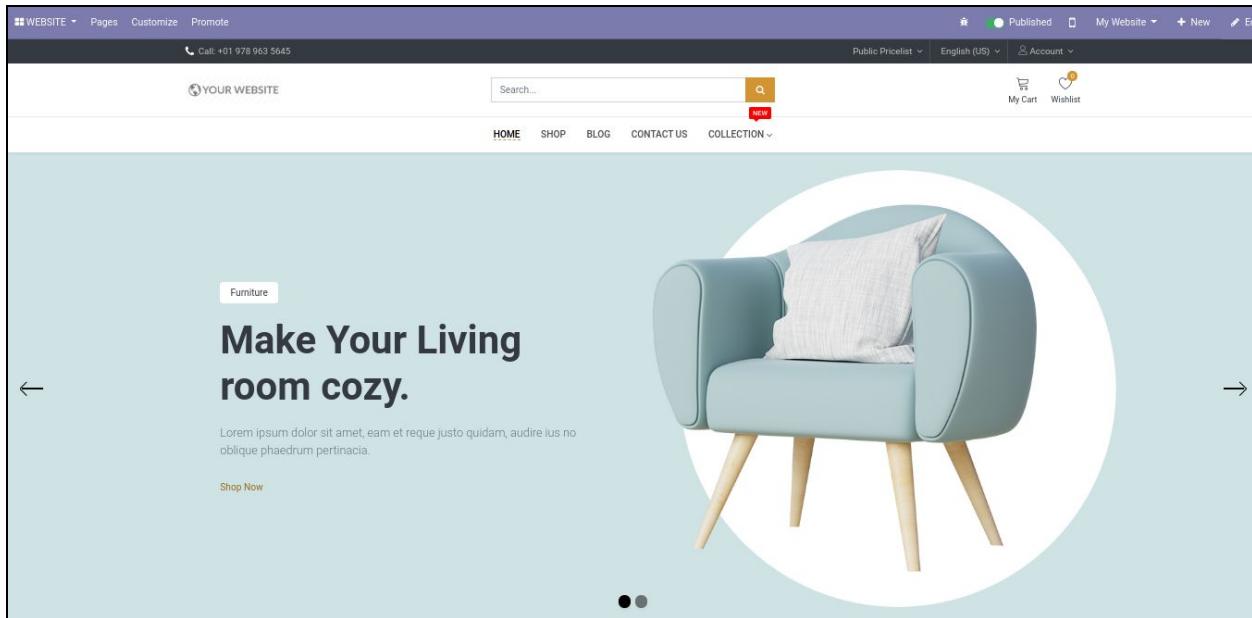

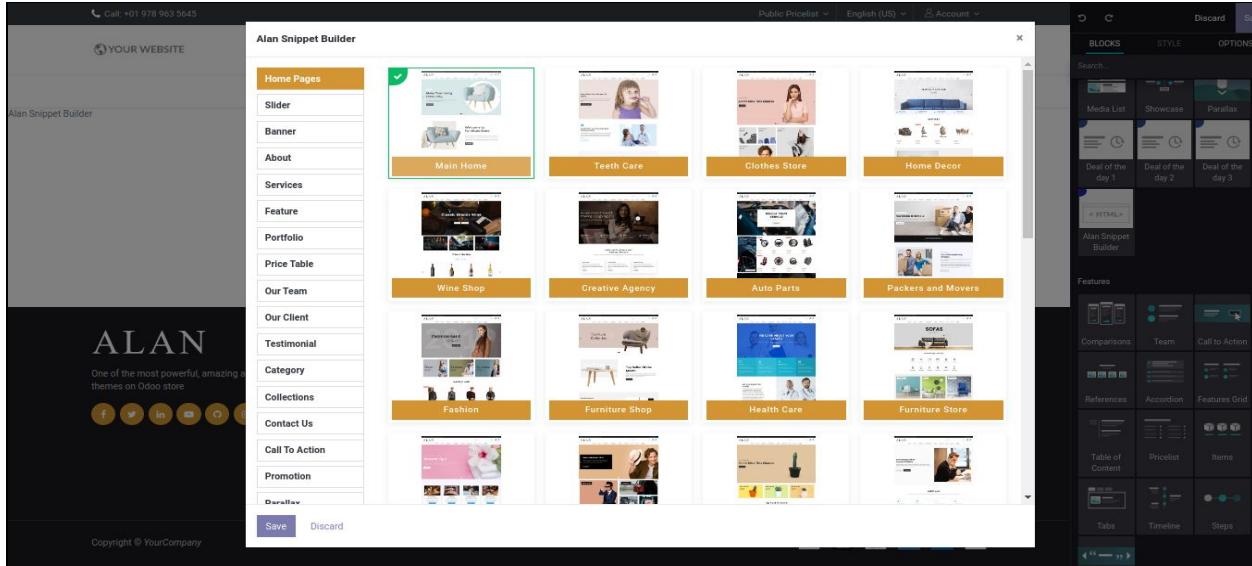

Step 5 : On dropping a snippet **one popup will open** there you have to **select your Blog collection** after that **click on continue** then click on **save button**. you will get your Blog collection into a webpage. **for example**

Alan Snippet Builder

One of the most powerful snippet of theme Alan, You need to drag and drop Alan Snippet Builder on any of page.

Once drag snippet on page then you can find lot of section like **Home page, Slider, About ,Services, Contact us, call to action** etc. You have to select one item from these section then click on **save button** and you will get that same selected **item** on your webpage.

Deals Of The Day Snippet

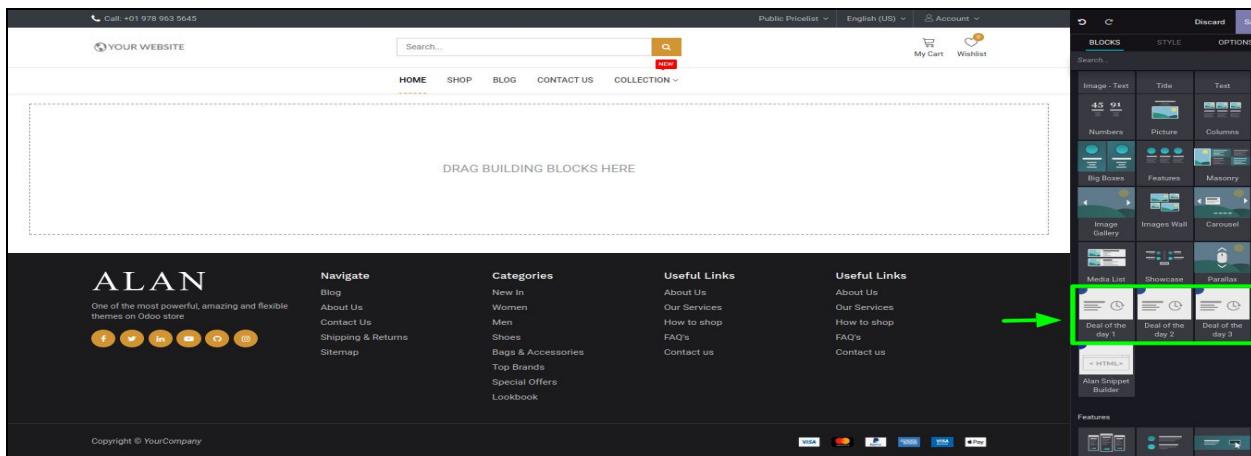

This snippet is very useful when some offer is running on your ecommerce website. It generally takes a static snippet and on that snippet you can put a dynamic timer that will show the remaining time of that offer.

To add this type functionality follow the following steps given below

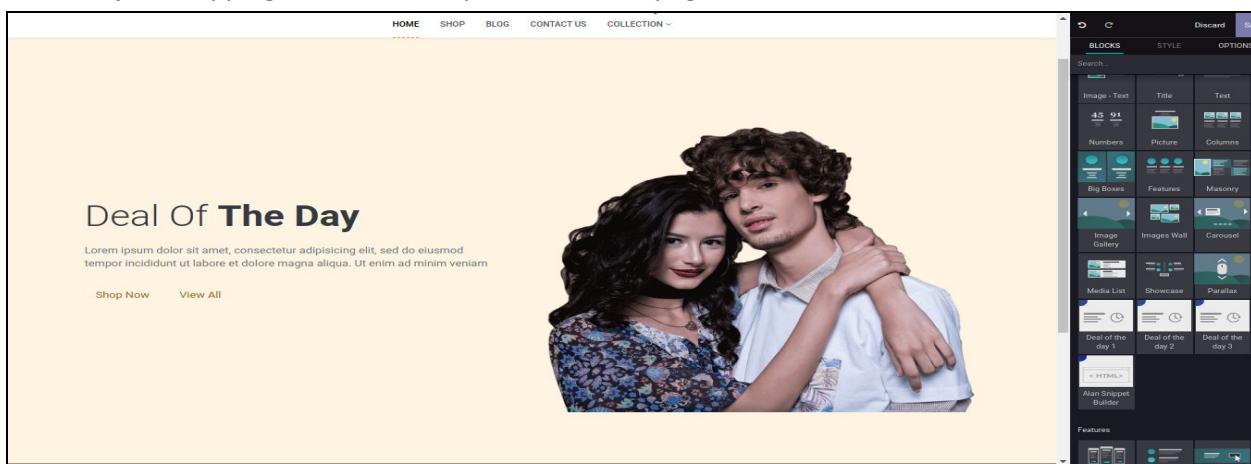

Step 1 : Login with your admin credentials.

Step 2 : Go to the website **click on the Edit button** given the **top right corner**.

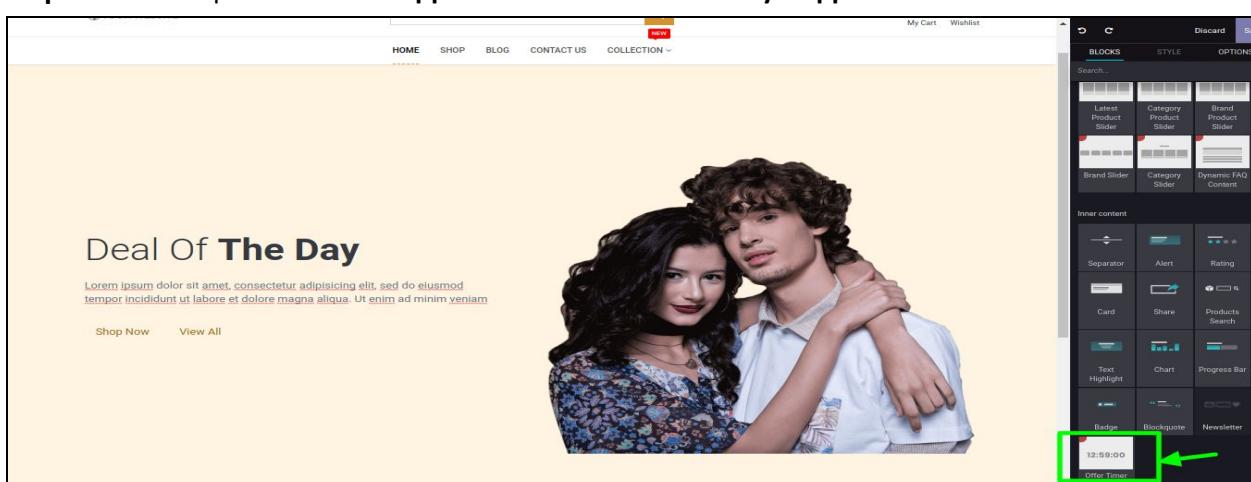

Step 3 : Drag and drop any **deal of the day snippet** into the webpage.

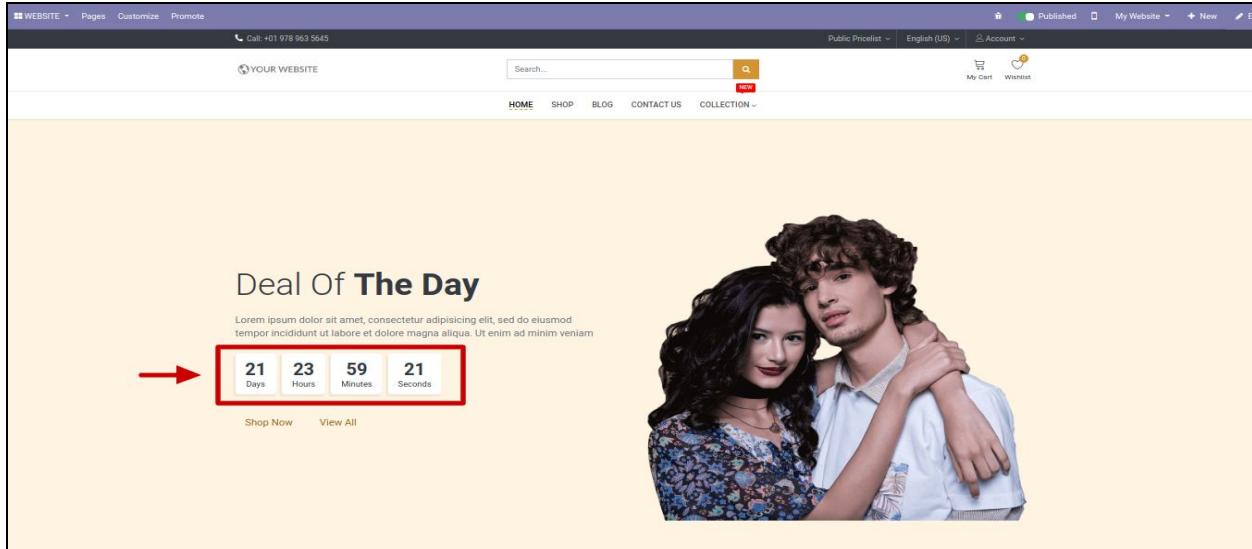

For example ,Dropping Deals of the day 1 into the webpage

Step 4 : Now Drop Offer timer Snippet into the Deals of the day snippet.

Step 5 : When you drop offer timer snippet the **one popup will open** there you have to **select data and time** it must be the **future date**. After selecting date click on **save button** then you will get your deal of the day snippet ready to use like this

Alan Custom Button

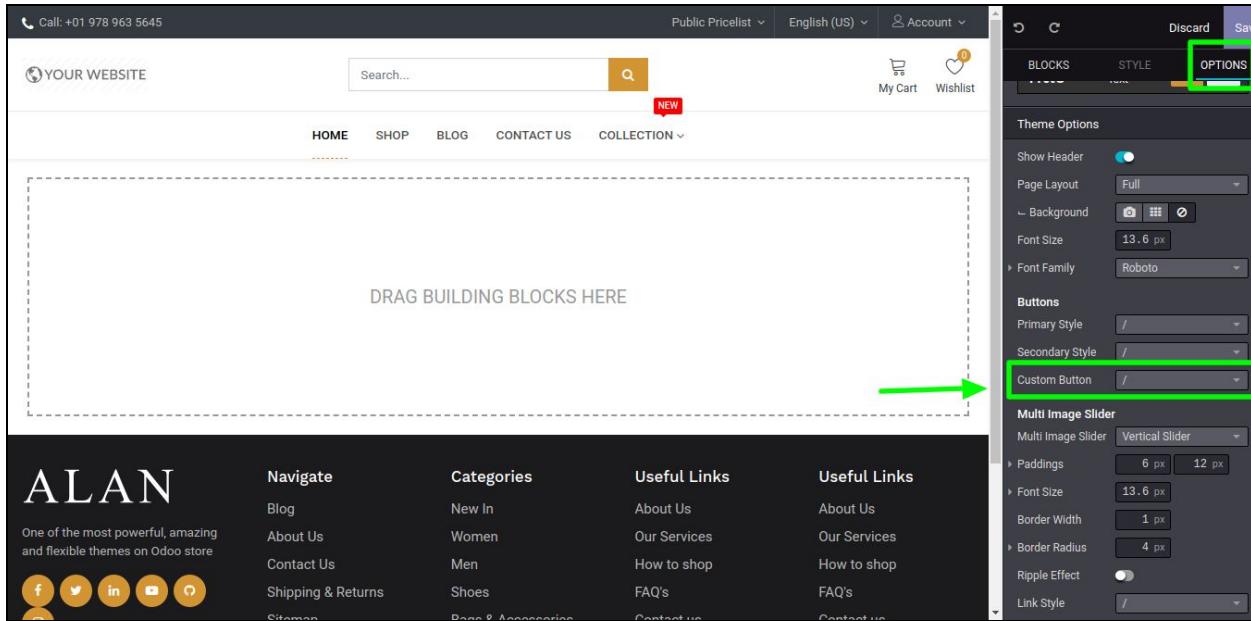

Theme Alan comes with a variety of custom buttons that will make your website more attractive.

To change the button style you have to follow few step given below:

Step 1 : Login with your **Admin credentials**.

Step 2 : Click on **Edit button** given at **top right corner**

Step 3 : Click on **Option Section** then **select any button style** from **custom button selection** field then save it. now see your website button style is change

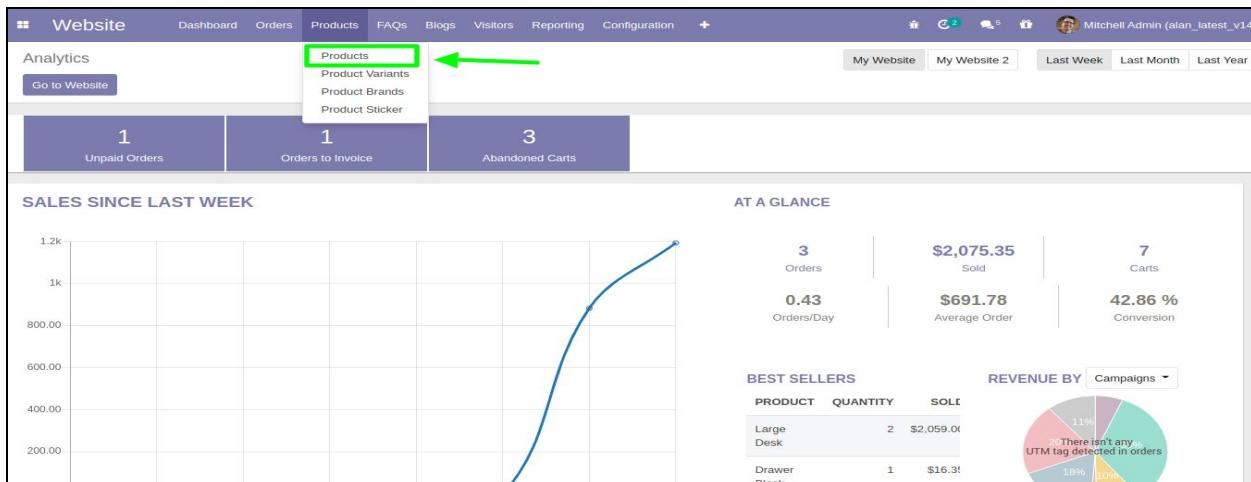

Dynamic Product Tabs

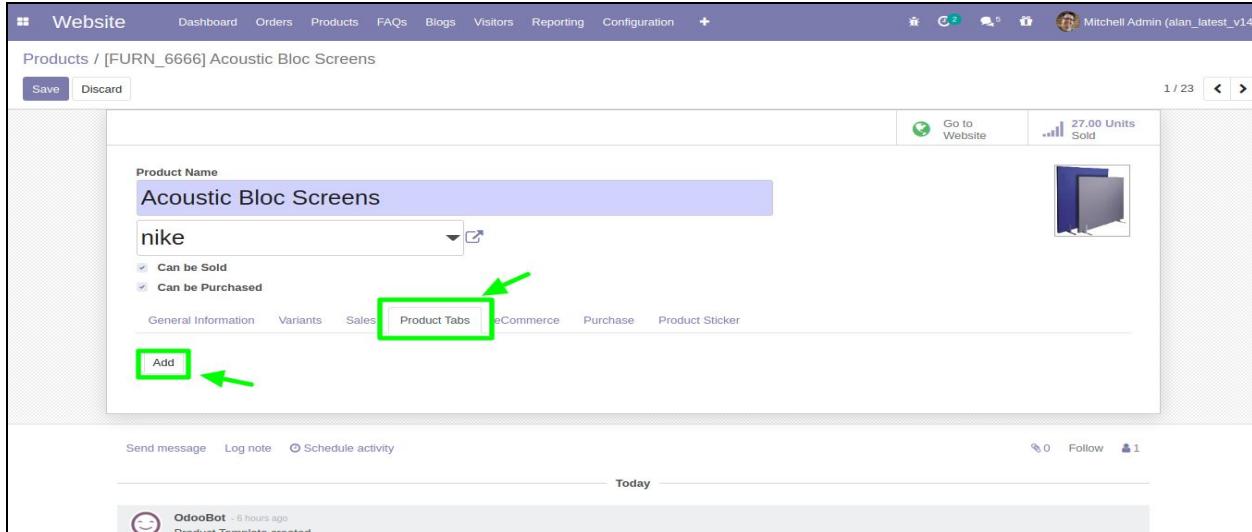

Product Tab is used to add more information about products on the product details page. It is a useful feature for ecommerce websites where we can add a variety of information in different types. To add this feature we have to follow few step given below:

Step 1 : login with your **Admin credentials**.

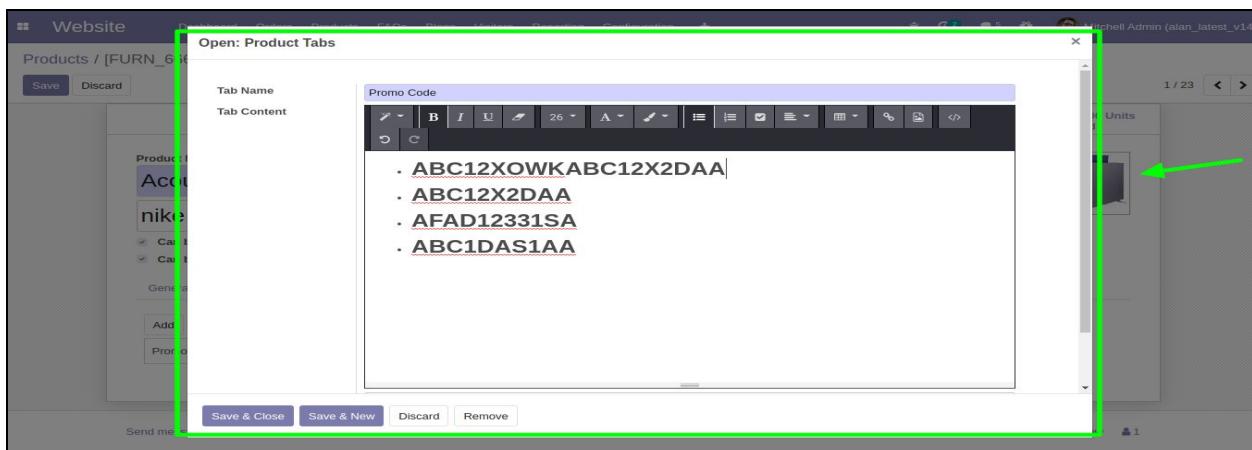

Step 2 : Go to **Website Menu -> Products -> Products -> Select any Products**

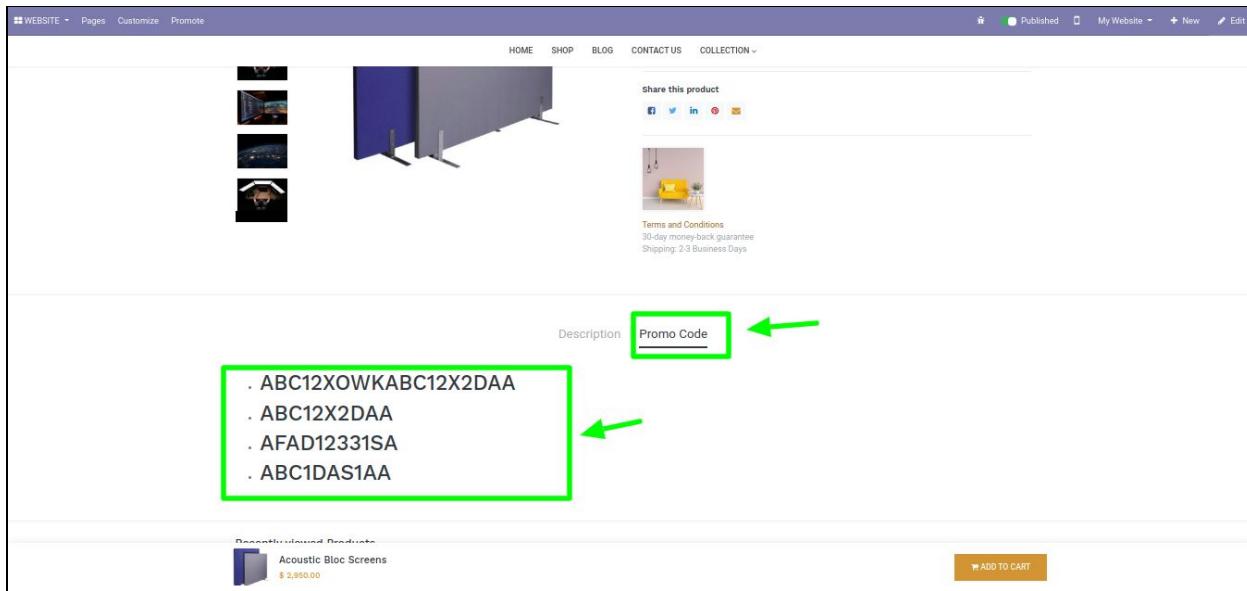

Step 3: Now Click on **Edit Button -> Click on Product Tabs -> Add Product information**

Step 4 : After Adding Information Click on **Save & Close** then click in **save button**

Step 5 : Go to Website and check you will get your own product tab.

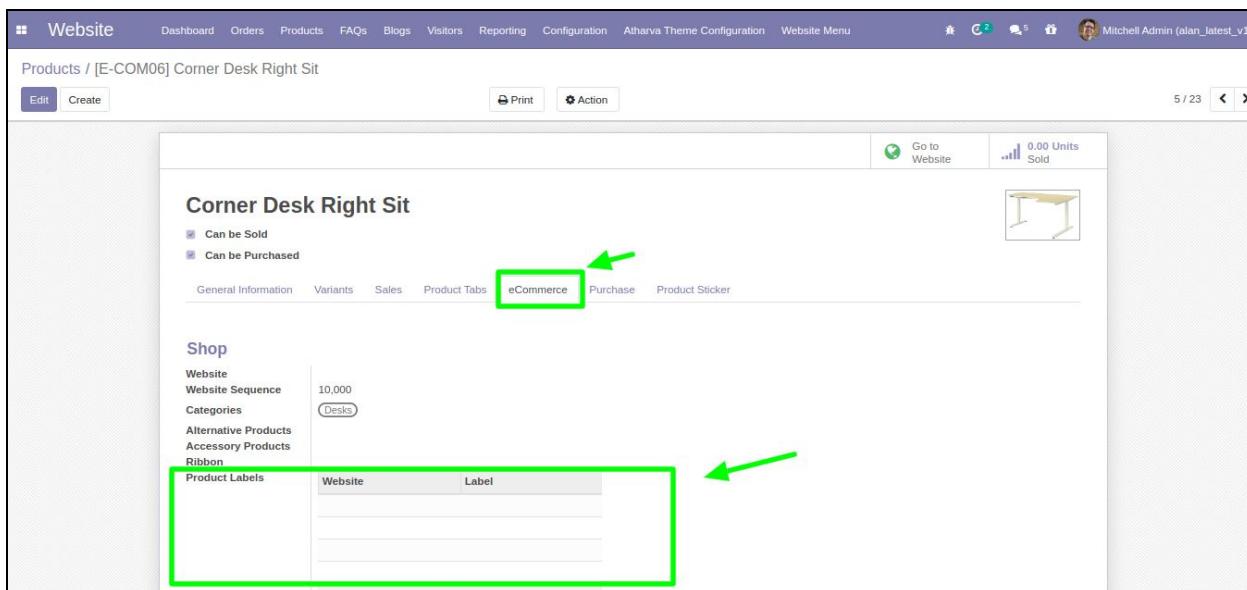

Product Label

Product label is used to set a label on a product. This Product label is very useful when you have special offer on product at that time you can set label on that product that will show small information regarding the offer.

To add Product label we have to follow few step given below:

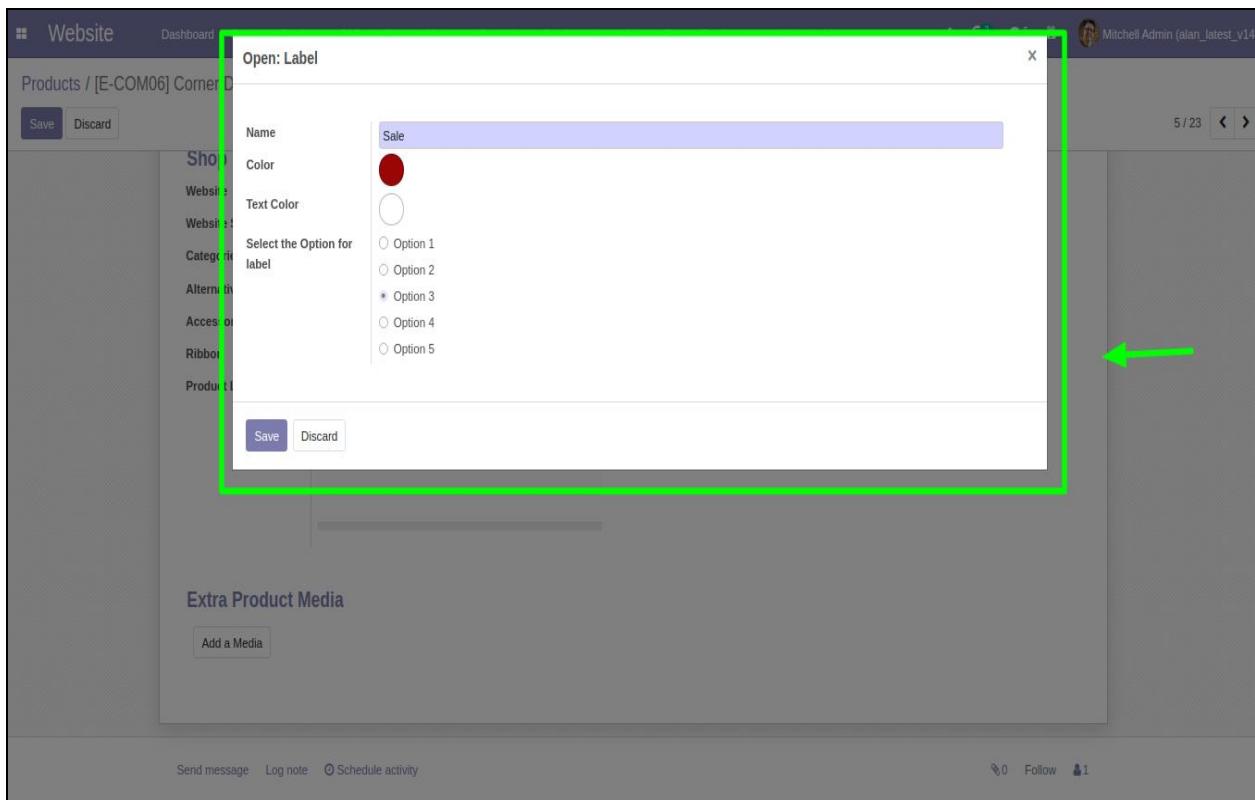

Step 1 : Login with Admin credentials

Step 2 : Go to website menu -> Products -> Products -> Select any product -> Go to ecommerce tab

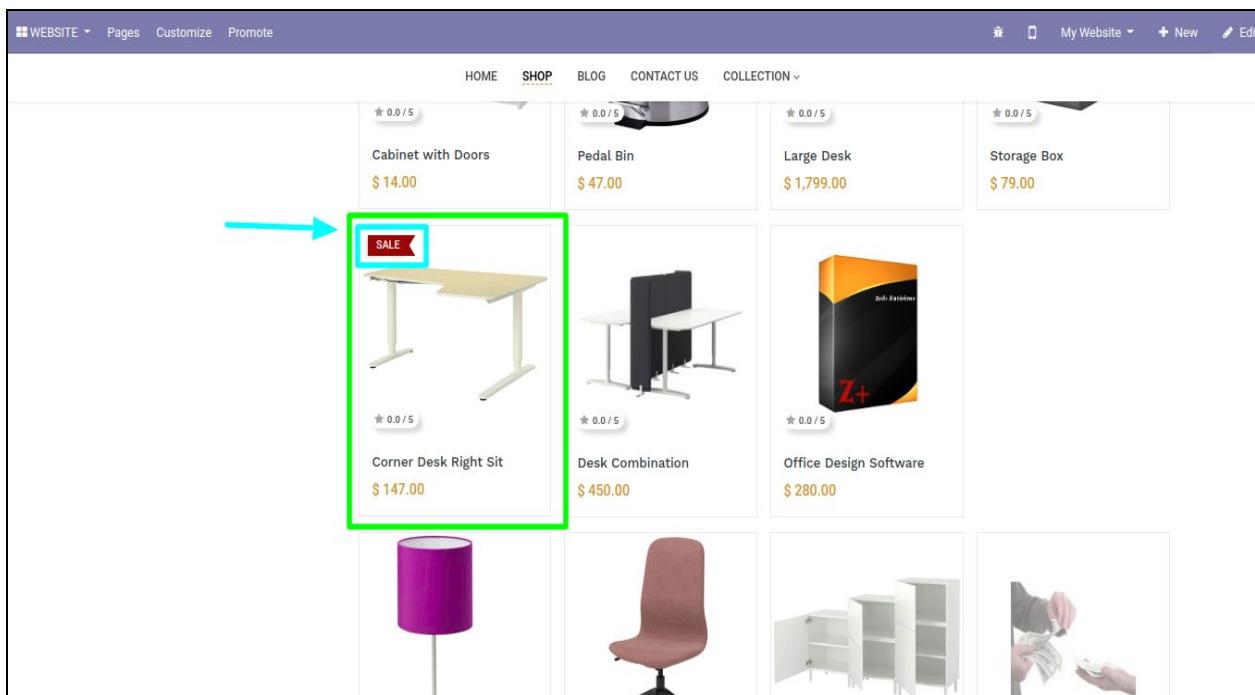

Step 2 : Now Fill the information in **Product label field** by selecting website and selecting or creating

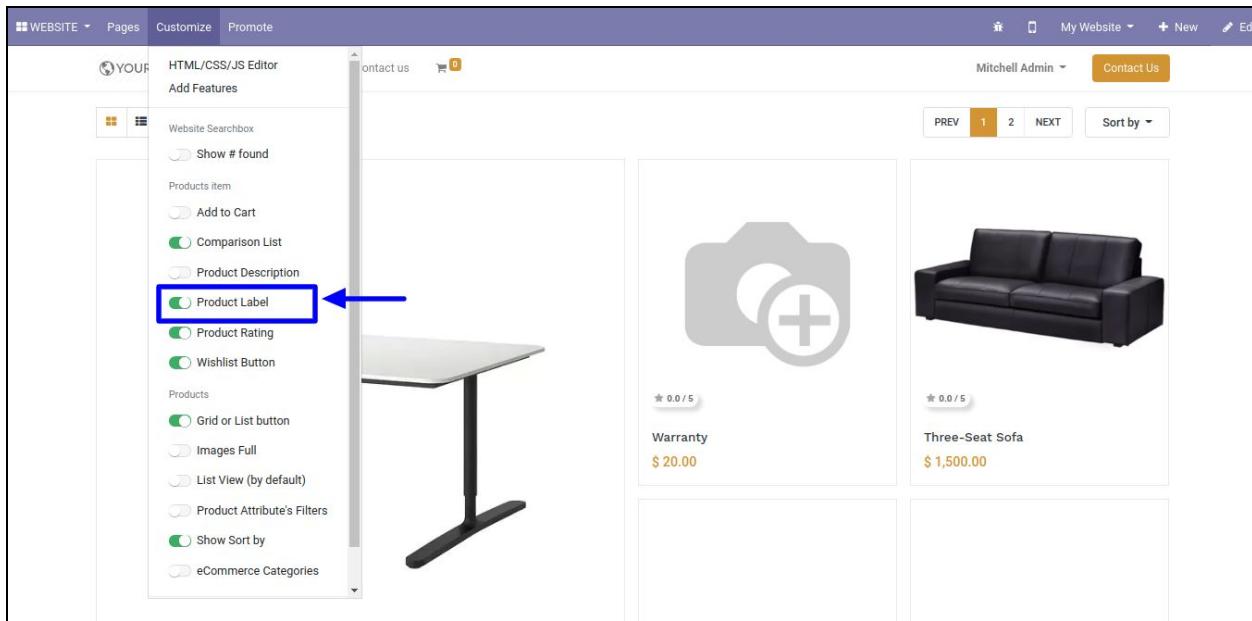

label then click on **save buttons** and check in website you will get your label

* Here you can see label is added at top of product

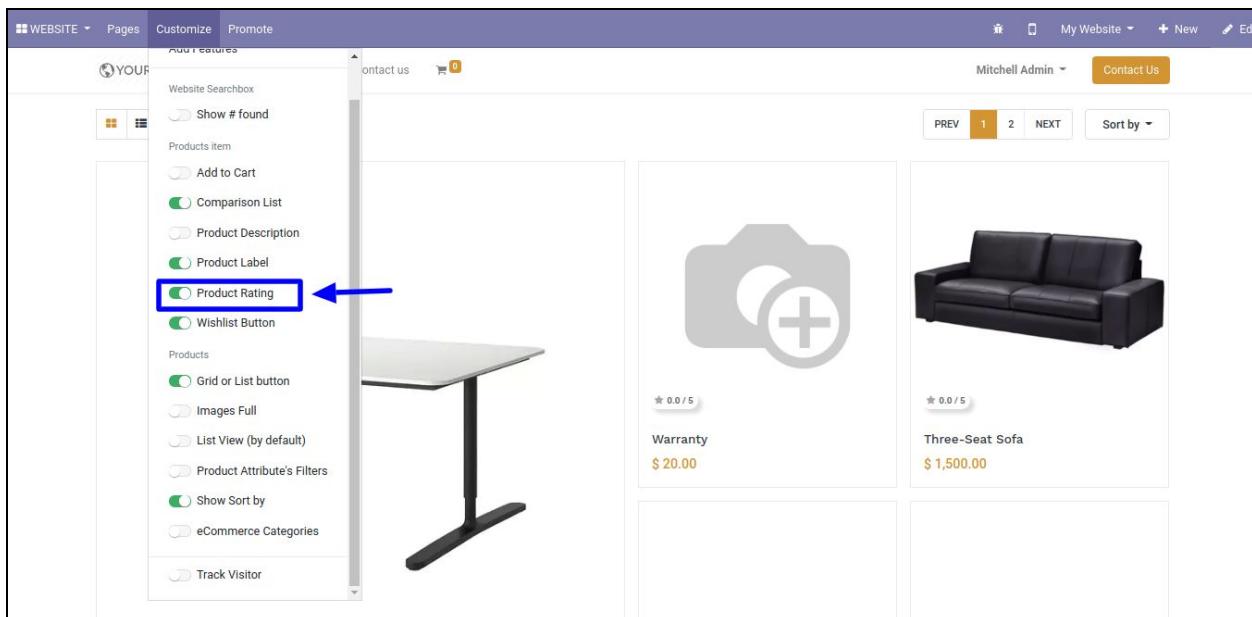

* Note: You can also disable your product label feature

Product Rating

It is used to display the **product rating** on the shop page given by the users. **it is already active** in your theme if you **want to disable** this feature then **switch off** from the **customize menu**. It is also **available in Product Detail page** named **Discussion and Rating**

* Shop Page

* Product Detail Page

Product Sticker

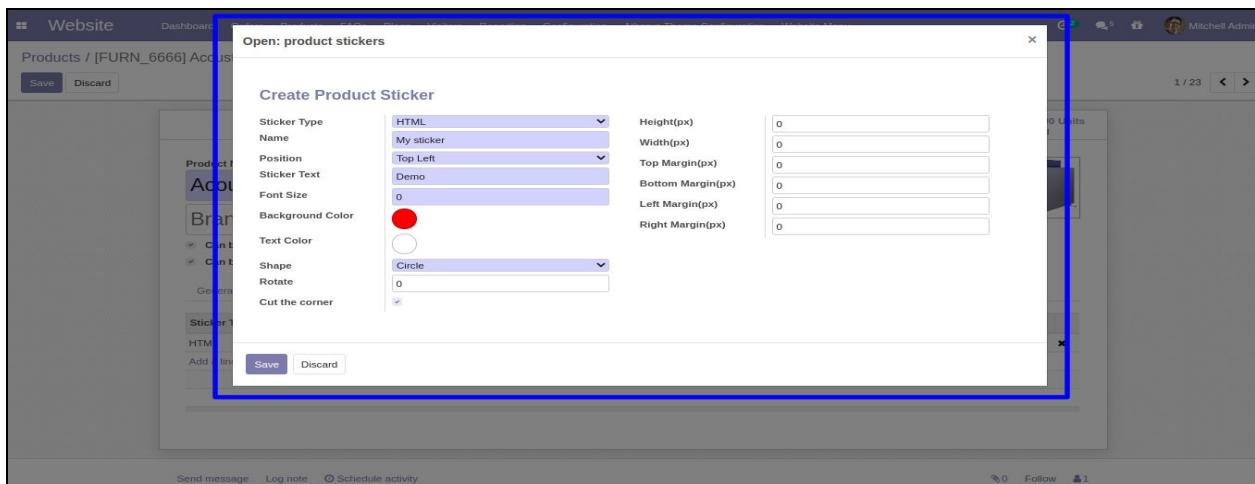

It is an amazing feature where you can add your own sticker on the product sticker. To add the sticker on your product follow the following steps given below:

Step 1 : Login with your Admin credentials

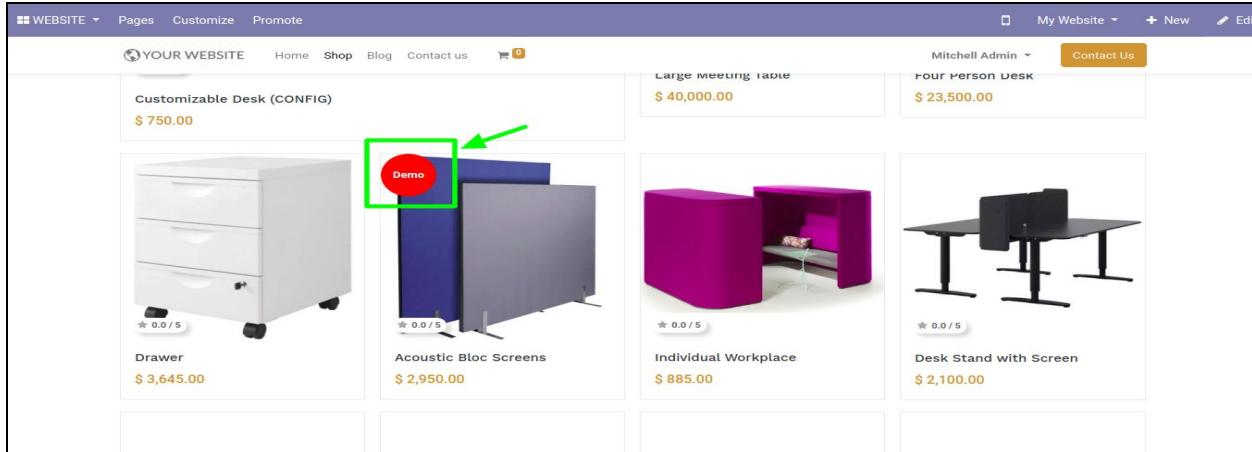

Step 2 : Go to website menu -> Products -> Products -> Select Any Product -> Click on Product Sticker Tab

Step 3 : Click on Edit Button -> Add or create your own sticker -> Then click on save button -> Click on save button in product section as well

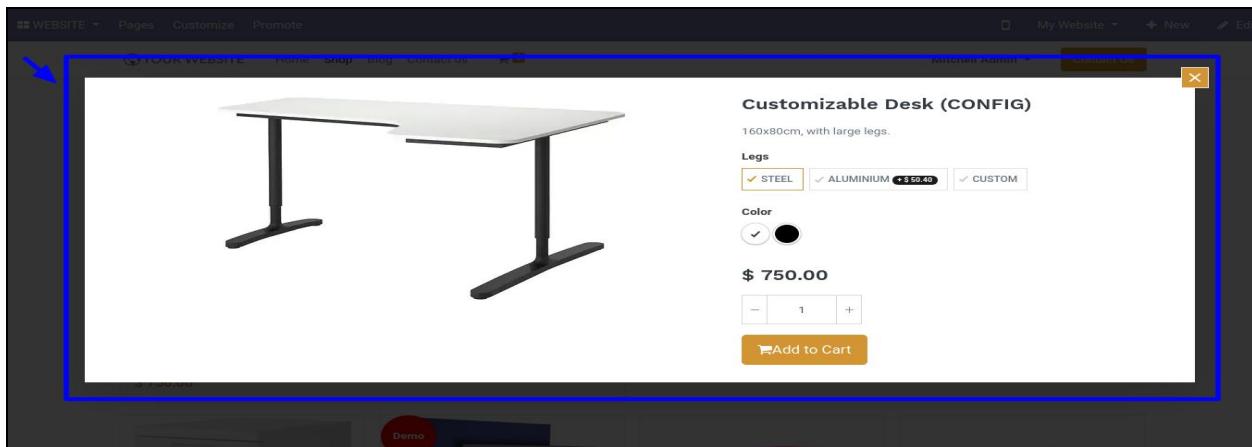

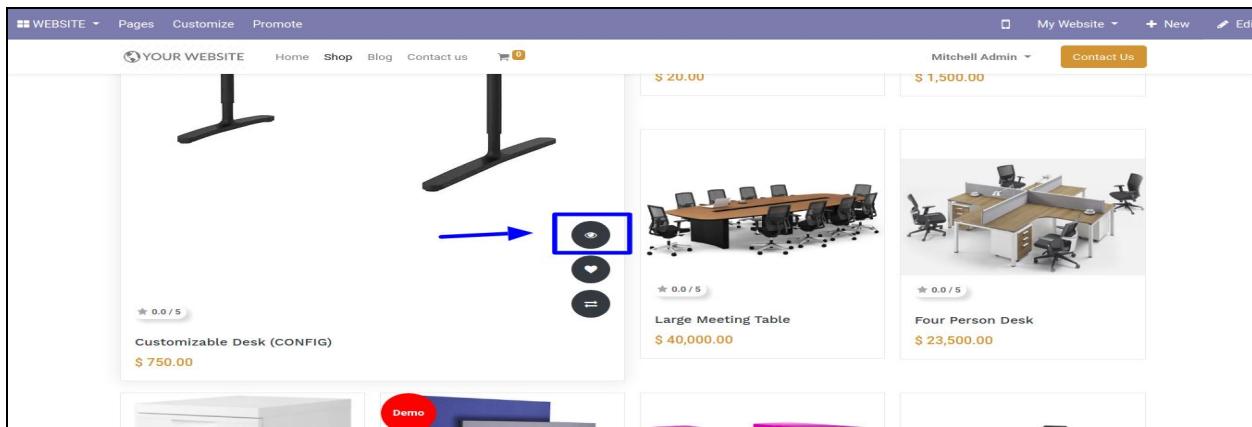

Step 4 : Go to website check you will get your own sticker on product

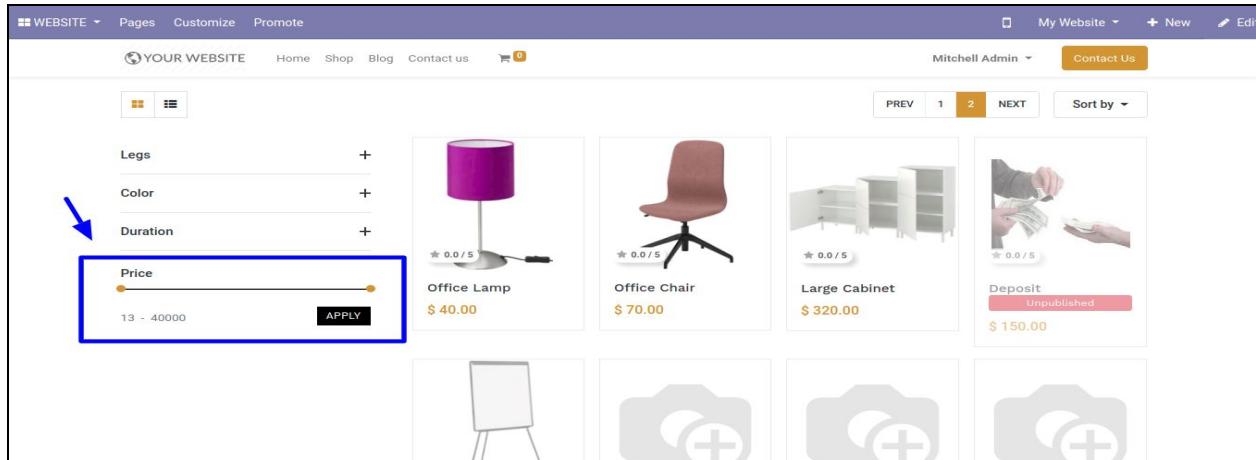

Quick View

This feature helps users to **quickly check product details without going inside the product details page.**

Price Filter

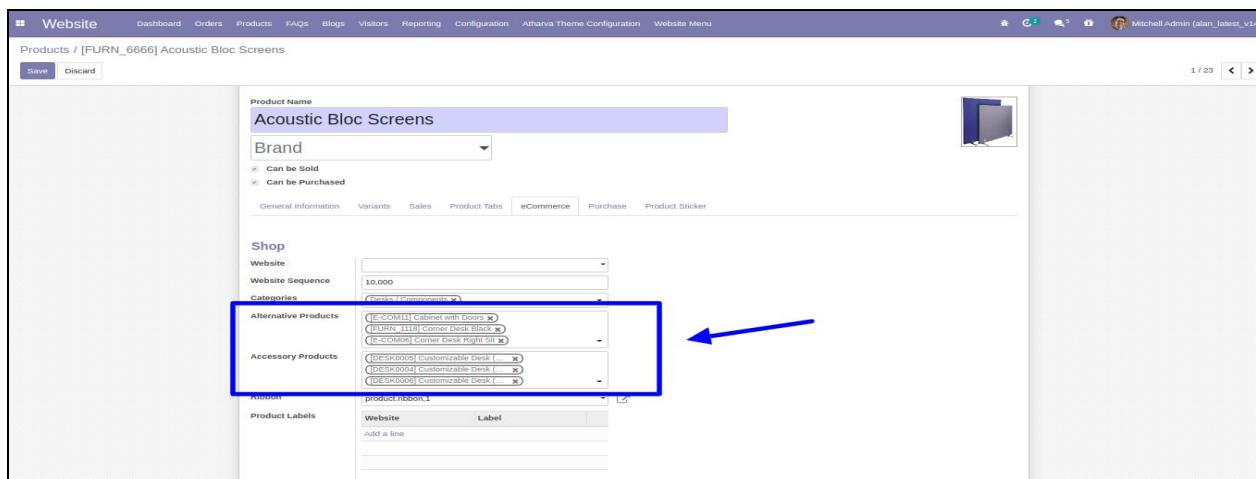

It filters the product between minimum and maximum price that you apply on the shop page and it is connected with all **attribute, search ,sorting** features so you can get your desired product quickly.

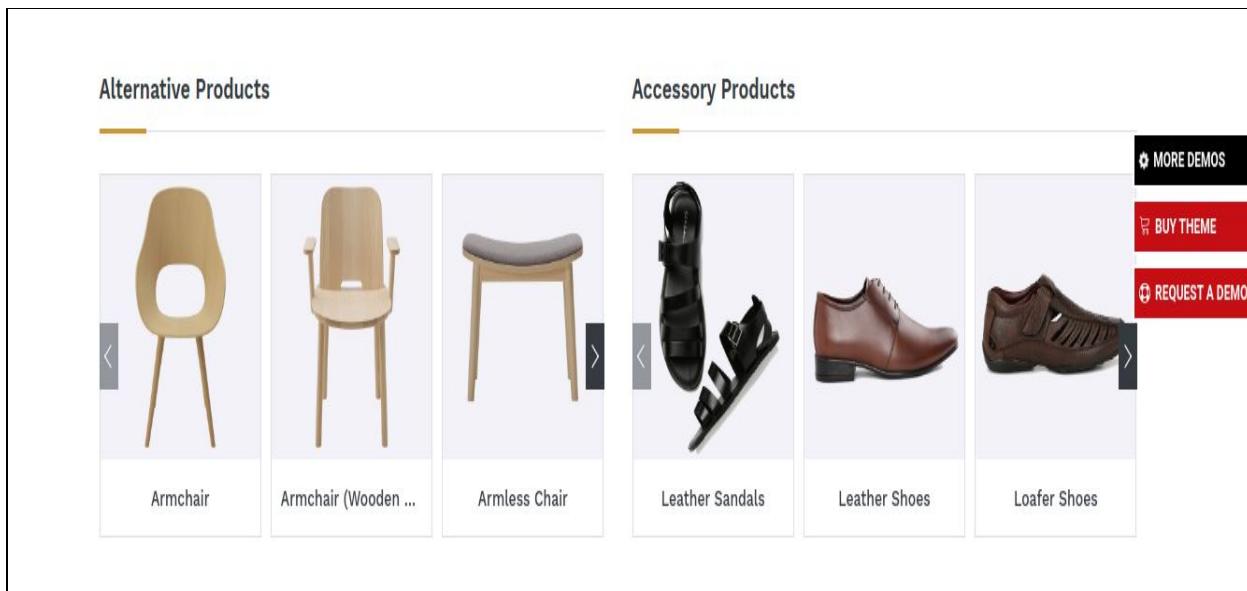

New Accessory And Alternative Product Slider

You can add required new stylist Accessory and alternative products in selected products using odoo default field.

To use this new stylist accessory and alternative product slider **go to ecommerce tab in product view**

After adding accessory and alternative go to that product in product detail page and check you will get accessory and alternative product slider like this

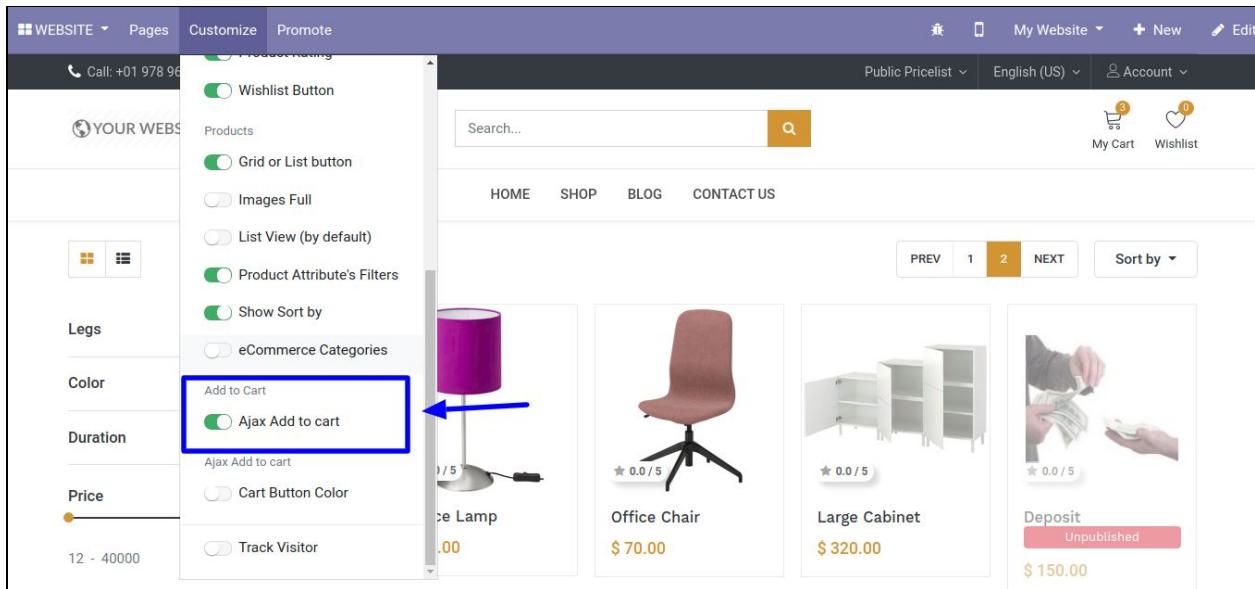

Ajax Add to cart

It is one of the amazing features of theme alan where you can add your product into the cart without going into the cart page. If the product has a variant then you will redirect to that product detail page and if not that you can see the product fly to the cart icon. To activate this feature follow the following steps given below

Step 1 : Switch on Add to Cart button from **customize menu**.

Step 2 : Switch on Ajax Add to Cart button from the **customize menu** if it is not on.

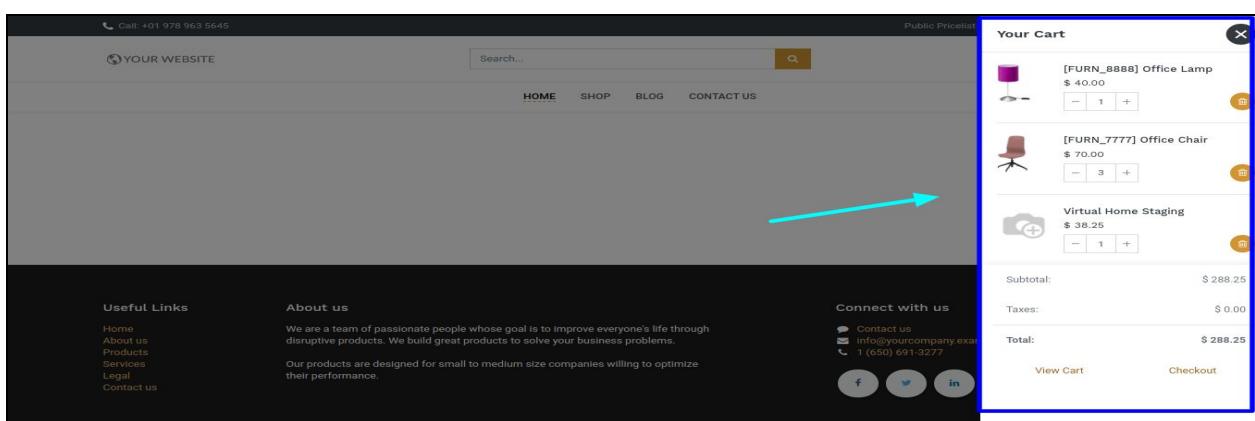

Step 3 : Now try to add the product into the cart. you will find that your **product is added into the cart on fly**.

Lord More Product On Scrolling

This feature is already active by default in theme alan in which you observe that when you scroll down then the next page product is automatically loaded into the page.

Advance Mini Cart

This feature works with custom header only. When you add custom header in your website you will find that when clicking on cart then the mini cart is open right side which is very useful because to check cart item you don't need to go into cart page you will get cart item on current page.that's the power advance min cart.

**Thank
You**
